Multidisciplinary Design Optimization and Its Application in Deep Manned Submersible Design Binbin Pan, Weicheng Cui, 2020-08-28 This book investigates Reliability based Multidisciplinary Design Optimization RBMDO theory and its application in the design of deep manned submersibles DMSs Multidisciplinary Design Optimization MDO is an effective design method for large engineering systems like aircraft warships and satellites which require designers and engineers from various disciplines to cooperate with each other MDO can be used to handle the conflicts that arise between these disciplines and focuses on the optimal design of the system as a whole However it can also push designs to the brink of failure In order to keep the system balanced Reliability based Design RBD must be incorporated into MDO Consequently new algorithms and methods have to be developed for RBMDO theory This book provides an essential overview of MDO RBD and RBMDO and subsequently introduces key algorithms and methods by means of case analyses In closing it introduces readers to the design of DMSs and applies RBMDO methods to the design of the manned hull and the general concept design The book is intended for all students and researchers who are interested in system design theory and for engineers working on large complex engineering systems

Multidisciplinary Design Optimization in Computational Mechanics Piotr Breittkopf, Rajan Filomeno Coelho, 2013-02-04 Multidisciplinary Design Optimization in Computational Mechanics This book provides a comprehensive introduction to the mathematical and algorithmic methods for the Multidisciplinary Design Optimization MDO of complex mechanical systems such as aircraft or car engines We have focused on the presentation of strategies efficiently and economically managing the different levels of complexity in coupled disciplines e g structure fluid thermal acoustics etc ranging from Reduced Order Models ROM to full scale Finite Element FE or Finite Volume FV simulations Particular focus is given to the uncertainty quantification and its impact on the robustness of the optimal designs A large collection of examples from academia software editing and industry should also help the reader to develop a practical insight on MDO methods

Multidisciplinary Design Optimization Natalia M. Alexandrov, M. Yousuff Hussaini, 1997-01-01 Multidisciplinary design optimization MDO has recently emerged as a field of research and practice that brings together many previously disjointed disciplines and tools of engineering and mathematics MDO can be described as a technology environment or methodology for the design of complex coupled engineering systems such as aircraft automobiles and other mechanisms the behavior of which is determined by interacting subsystems

Collaborative Multidisciplinary Design Optimization for Conceptual Design of Complex Products Edris Safavi, 2016-10-06

MULTIDISCIPLINARY design optimization MDO has developed in theory and practice during the last three decades with the aim of optimizing complex products as well as cutting costs and product development time Despite this development the implementation of such a method in industry is still a challenge and many complex products suffer time and cost overruns Employing higher fidelity models HFMs in conceptual design one of the early and most important phases in the design process can play an important role in increasing the knowledge base regarding the concept under evaluation However design space in the presence of HFMs could significantly be expanded MDO has proven to be an important tool for searching the design space and finding optimal solutions This leads to a reduction in the number of design iterations later in the design process with wiser and more robust decisions made early in the design process to rely on In complex products different systems from a multitude of engineering disciplines have to work tightly together This stresses the importance of evolving various domain experts in the design process to improve the design from diverse engineering perspectives Involving more engineers in the design process early on raises the challenges of collaboration known to be an important barrier to MDO implementation in industry Another barrier is the unavailability and lack of MDO experts in industry those who understand the MDO process and know the implementation tasks involved In an endeavor to address the mentioned implementation challenges a novel collaborative multidisciplinary design optimization CMDO framework is defined in order to be applied in the conceptual design phase CMDO provides a platform where many engineers team up to increase the likelihood of more accurate decisions being taken early on The structured way to define the engineering responsibilities and tasks involved in MDO helps to facilitate the implementation process It will be further elaborated that educating active engineers with MDO knowledge is an expensive and time consuming process for industries Therefore a guideline for CMDO implementation in conceptual design is proposed in this thesis that can be easily followed by design engineers with limited prior knowledge in MDO The performance of the framework is evaluated in a number of case studies including applications such as aircraft design and the design of a tidal water power plant and by engineers in industry and student groups in academia
