Team Erin C. Tarver, 2017-06-26 There is one sound that will always be loudest in sports It isn't the squeak of sneakers or the crunch of helmets it isn't the grunts or even the stadium music It's the deafening roar of sports fans For those few among us on the outside sports fandom with its war paint and pennants its pricey cable TV packages and esoteric stats reeled off like code looks highly irrational entertainment gone overboard But as Erin C Tarver demonstrates in this book sports fandom

has become extraordinarily important to our psyche a matter of the very essence of who we are Why in the world Tarver asks would anyone care about how well a total stranger can throw a ball or hit one with a bat or toss one through a hoop Because such activities and the massive public events that surround them form some of the most meaningful ritual identity practices we have today They are a primary way we as individuals and a collective decide both who we are who we are not And as such they are also one of the key ways that various social structures such as race and gender hierarchies are sustained lending a dark side to the joys of being a sports fan Drawing on everything from philosophy to sociology to sports history she offers a profound exploration of the significance of sports in contemporary life showing us just how high the stakes of the game are

Fiction, Invention and Hyper-reality Carole M. Cusack, Pavol Kosnác, 2016-11-18 The twentieth century was a period of rapid change for religion Secularisation resulted in a dramatic fall in church attendance in the West and the 1950s and 1960s saw the introduction of new religions including the International Society for Krishna Consciousness ISKCON the Church of Scientology and the Children of God New religions were regarded with suspicion by society in general and Religious Studies scholars alike until the 1990s when the emergence of a second generation of new new religions based on popular cultural forms including films novels computer games and comic books and highly individualistic spiritualities confirmed the utter

transformation of the religious spiritual landscape Indeed Scientology and ISKCON appeared almost traditional and conservative when compared to the radically de institutionalised eclectic parodic fun loving and experimental fiction based invented and hyper real religions In this book scholarly treatments of cutting edge religious and spiritual trends are brought into conversation with contributions by representatives of Dudeism the Church of All Worlds the Temple of the Jedi Order and Tolkien spirituality groups This book will simultaneously entertain shock challenge and delight scholars of religious studies as well as those with a wider interest in new religious movements **The Precarious Generation** Judith

Bessant, Rys Farthing, Rob Watts, 2017-05-08 This book draws on a wealth of evidence including young people's own stories to document how they are now faring in increasingly unequal societies like America Britain Australia France and Spain It points to systematic generational inequality as those born since 1980 become the first generation to have a lower standard of living than previous generations While governments and experts typically explain this by referring to globalization new technologies or young people's deficits the authors of this book offer a new political economy of generations which identifies the central role played by governments promoting neoliberal policies that exacerbate existing social inequalities based on age ethnicity gender and class The book is a must read for social science students human service workers and policy makers and indeed for anyone interested in understanding the impact of government policy over the last 40 years on young people

Aftershock John Feffer, 2017-11-15 In this unique panoramic account of faded dreams journalist John Feffer returns to Eastern Europe a quarter of a century after the fall of communism to track down hundreds of people he spoke to in the initial atmosphere of optimism as the Iron Curtain fell from politicians and scholars to trade unionists and grass roots activists What he discovers makes for fascinating if sometimes disturbing reading From the Polish scholar who left academia to become head of personnel at Ikea to the Hungarian politician who turned his back on liberal politics to join the far right Jobbik party Feffer meets a remarkable cast of characters He finds that years of free market reforms have failed to deliver prosperity corruption and organized crime are rampant while optimism has given way to bitterness and a newly invigorated nationalism Even so through talking to the region's many extraordinary activists Feffer shows that against stiff odds hope remains for the region's future America the Fair Dan Meegan, 2019-04-15 What makes a person liberal or conservative Why does the

Democratic Party scare off so many possible supporters When does our injustice trigger get pulled and how can fairness overcome our human need to look for a zero sum outcome to our political battles Tapping into a pop culture zeitgeist linking Bugs Bunny Taylor Swift and John Belushi through popular science and the human brain to our political predilections arguments and distrusts Daniel Meegan suggests that fairness and equality are key elements missing in today's society Having crossed the border to take up residency in Canada Meegan an American citizen has seen first hand how people enjoy as rights what Americans view as privileges Fascinated with this tension he suggests in *America the Fair* that American liberals are just missing the point If progressives want to win the vote they need to change strategy completely and champion

government benefits for everyone not just those of lower income If everyone has access to inexpensive quality health care open and extensive parental leave and free postsecondary education then everyone will be happier and society will be fair The Left will also overcome an argument of the Right that successfully though incongruously appeals to the middle and upper middle classes that policies that help the economically disadvantaged are inherently bad for others Making society fair and equal Meegan argues would strengthen the moral and political position of the Democratic Party and place it in a position to revive American civic life Fairness he writes should be selfishly enjoyed by everyone **Recoded City** Thomas Ermacora, Lucy Bullivant, 2016-07-01 Recoded City examines alternative urban design planning and architecture for the other 90% namely the practice of participatory placemaking a burgeoning practice that co author Thomas Ermacora terms recoding In combining bottom up and top down means of regenerating and rebalancing neighbourhoods affected by declining welfare or struck by disaster this growing movement brings greater resilience Recoded City sheds light on a new epoch in the relationship between cities and civil society by presenting an emerging range of collaborative solutions and distributed governance models The authors draw on their own fresh research of global pioneers forging localist design strategies public realm interventions and new stakeholder dynamics As the world becomes increasingly digital and virtual a myriad of online tools and technological options is becoming available These give unprecedented co creation opportunities to communities and professionals alike yielding the benefits of a more open DIY society Because of its close engagement with people place and local identity the field of participatory placemaking has huge untapped potential Responding to the challenges of the Anthropocene era Recoded City is for decision makers developers and practitioners working globally to make better and more liveable cities
