Squires,2017-10-16

The federal Fair Housing Act of 1968 was passed in a time of turmoil conflict and often conflagration in cities across the nation It took the assassination of Dr Martin Luther King Jr to finally secure its passage The Kerner Commission warned in 1968 that to continue present policies is to make permanent the division of our country into two societies one largely Negro and poor located in the central cities the other predominantly white and affluent located in the suburbs and outlying areas The Fair Housing Act was passed with a dual mandate to end discrimination and to dismantle the segregated living patterns that characterized most cities The Fight for Fair Housing tells us what happened why and what remains to be done Since the passage of the Fair Housing Act the many forms of housing discrimination and segregation and associated consequences have been documented At the same time significant progress has been made in counteracting discrimination and promoting integration Few suburbs today are all white many people of color are moving to the suburbs and some white families are moving back to the city Unfortunately discrimination and segregation persist The Fight for Fair Housing brings together the nation s leading fair housing activists and scholars many of whom are in both camps to tell the stories that led to the passage of the Fair Housing Act its consequences and the implications of the act going forward Including an afterword by Walter Mondale this book is intended for everyone concerned with the future of our cities and equal access for all persons to housing and related opportunities Dragon Songs Vladimir Dinets,2013-11-01

A born naturalist and a fearless traveler Vladimir Dinets wrote travel guides conducted field research and lived a couple of lives before he was accepted into the PhD program in zoology at the University of Miami He thought crocodiles were a dead end research topic survivors from the age of the dinosaurs but not much else until he witnessed groups of up to seventy alligators performing mating choruses that included infrasound vibrations a form of communication extremely rare in nature and a

dance unknown in the scientific literature but that resembled a scene from Jurassic Park To prove his thesis about the language of crocodiles he spent the next six years traveling around the world on shoestring budgets and in extreme circumstances studying almost every living species At the same time as a man desiring companionship in life he sought love With adventures on five continents Dragon Songs is his account of this quest It includes an escape from a boiling lava lake in the Afar Desert being chased up a tree by a tiger in India hitching a ride with a cocaine smuggler in Bolivia and diving with giant Greenland sharks all in the name of studying crocodiles among which he routinely paddled in his inflatable kayak Of course not everything went according to plan But in the end his ground breaking research helped change the field And during the course of his adventures he met and courted his future wife
