## — Independent Assortment and Genetic Linkage

Hereditary traits (morphological and physiological characteristics) follow predictable patterns of inheritance, and the laws governing these patterns (Mendel's experiments on *Pisum sativum* and the study of human inheritance) are well known.

In this activity you will study the patterns of inheritance of multiple genes in (imaginary) dragons. These dragons have two pairs of homologous chromosomes in each cell. You will see that, since genes are carried on chromosomes, the patterns of inheritance are determined by the behavior of chromosomes during mitosis and fertilization.

### The Law of Independent Assortment — Inheritance of Genes on Different Chromosomes

For this activity, we will only consider one gene on each chromosome. These genes are described in the following table.

	Dominant Alleles	Recessive Alleles
Chromosome 1	W = long wings	w = no wings
Chromosome 2	H = big horns	h = small horns

The mother dragon is heterozygous for the wing gene (Ww) and the horn gene (Hh). The father is homozygous recessive for the wing gene (ww) and the horn gene (hh). What phenotypic traits will each parent have? (If homozygous traits are the observable bodily characteristics.) Draw the appropriate characteristics for each parent.

Mother

Father

### Review of Inheritance of Single Genes

Draw a Punnett Square to show the inheritance of the horn alleles for a mating between this mother and father.

On average, what fraction of the baby dragons will have big horns?

<sup>1</sup> Mendel's first experiments used pea plants (*Pisum sativum*). A similar pea plant seed and chromosome is called a *pea*. (Peas are *legumes*, closely related to beans, lentils, and soybeans.) For more information on Mendel's work, visit <http://www.ck12.org/section/mendels-experiments/>.

Teacher's Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners Cheryll M. Adams, Alicia Cotabish, Debbie Dailey, 2021-09-23 A Teacher's Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners provides teachers and administrators with practical examples of ways to build comprehensive coherent and rigorous science learning experiences for gifted and advanced students from kindergarten to high school. It provides an array of examples across the four domains of science: physical sciences, Earth and space sciences, life sciences, and engineering technology and applications of science. Each learning experience indicates the performance expectation addressed and includes a sequence of activities, implementation examples, connections to the CCSS Math and CCSS ELA, and formative assessments. Chapters on specific instructional and management strategies, assessment, and professional development suggestions for implementing the standards within the classroom will be helpful for both teachers and administrators.

**Sunshine in the Dragon's Heart** Jaime Samms, 2018-12-04 When Sunny retires to the northern Ontario wilderness to mourn his parents' deaths, he's hoping the change of scenery will afford him some peace and quiet. His hopes are soon spectacularly dashed. In self-imposed exile, dragon Emile runs across the fold between his dimension and Sunny's and right into Sunny's arms. Centuries out of touch with human culture, bright, beautiful Emile incinerates any hope Sunny had for an ordinary existence. With dryads and water sprites coming to life all around them, Sunny can't deny the magic Emile brings to his life or his heart. But that same magic leads the unrelenting dragon who would keep Emile captive right to them. To save his love, Sunny will have to reach deep and find some magic of his own.

*Life's Vital Link* Y. W. Loke, 2013-05-23 The development of the placenta was a pivotal event in evolution. Without it, we would still be laying eggs instead of giving birth to live offspring. It represents the critical link between the foetus and the mother, but its character is extraordinary; it is, in effect, a foreign tissue that invades the mother's body. Compared to many other animals, the human placenta represents a particularly aggressive body. But how is it managed and controlled? How did such an organ evolve in the first place? And why is it tolerated by the mother? Y. W. Loke explores the nature of the placenta and what it can tell us about evolution, development, and genetics.

**The Answer to Nearly Everything** Peter Franklin, 2012-02 The only information we have on Atlantis is from a very ancient Egyptian account that describes it as bigger than all their neighbours combined. Why is this fact ignored by most of the fanciful theories? From Atlantis to our current scientific predictions, the truth about so many things becomes clear and obvious only if all the facts are collected and examined, yet many people just select those that agree with their thinking. The resulting conflict between experience and belief, truth and distortion, or good and bad is only resolved when science, philosophy, and theology are harmonized and examined as aspects of one universal truth.

Tshewang, Jane Gray Morrison, Michael Charles Tobias, 2018-11-13 This compact and elegant work equally fitting for both academic as well as the trade audiences provides a readily accessible and highly readable overview of Bhutan's unique opportunities and challenges. All her prominent environmental legislation, regulatory statutes, ecological customs and practices both in historic and contemporary terms. At the same time *Bionomics* places the ecological context including a section on animal rights in Bhutan within the nation's Buddhist spiritual and ethical setting. Historic contextualization accents the book's rich accounting of every national park and scientific reserve as well as providing up to the minute climate change related hurdles for the country. Merging the interdisciplinary sciences, engineering and humanities data in a compelling up to date portrait of the country, the authors have presented this dramatic compendium against the backdrop of an urgent global ecological time frame. It thus becomes clear that the articulated stakes for Bhutan like her neighboring Himalayan and Indian sub continental countries, China, India, Bangladesh and Myanmar are immense as the Anthropocene epoch unfolds affecting every living being across the planet. Because Bhutan's two most rewarding revenue streams derive from the sale of hydro electric power and from tourism, the complexities of modern pressures facing a nation that prides herself on maintaining traditional customs in what has been a uniquely isolated nation are acute. **Dragon Lord Messiah** Elijah

**Associations between Reading and Mathematics: Genetic, Brain Imaging, Cognitive and Educational Perspectives** Sarit Ashkenazi, Orly Rubinsten, Bert De Smedt, 2017-10-05 Converging evidence demonstrates a strong link between reading and mathematics multiple cognitive processes are shared between reading and mathematics including the representation and

retrieval of symbolic information attention working memory and cognitive control Additionally multiple brain networks are involved in both math and reading and last common genetic factors might influence both reading and math Hence it comes as no surprise that there are meaningful associations between aspects of math and reading abilities Moreover comorbidity rates between math learning disabilities MD and reading disabilities RD are high up to 66% and prevalence rate of the comorbid condition is reported to be more common than the prevalence rate of isolated math learning disabilities Accordingly the goal of the research topic is to explore the underline mechanisms of this overlap between reading and math The research topic aims to include the following topics Genetics it has been found that both RD and MD are based on genetic factors and run in families Moreover math problem solving shares significant genetic overlap with general cognitive ability and reading decoding whereas math fluency shares significant genetic overlap with reading fluency and general cognitive ability Hence this topic will explore the shared and unique genetic risk factors to RD and MD In addition to shared and unique genetic influence on reading and math Neural perspective converging evidence from both structural and multiple functional imaging studies involving a wide range of numerical tasks points to the intraparietal sulcus IPS as a core region that involve in quantity manipulation However several additional brain areas such as frontoparietal and temporoparietal areas were found to be involved in numerical tasks Individuals with MD show deficits in a distributed set of brain regions that include the IPS fusiform gyrus in posterior brain regions and pre frontal cortex regions Similarly converging evidence indicate that the left hemisphere regions centered in the fusiform gyrus temporoparietal cortex and pre frontal cortex regions are strongly involve in typical reading and present lower activity connectivity or abnormal structure in RD Thus there is a meaningful neural overlap between reading and math Hence the authors can submit empirical studies on the role of several of brain regions that are involved in math and reading commonality and diversity both in the typical and a typical development Cognitive factors that play role in mathematics and reading and comorbidity between RD and MD There is a long lasting debate whether MD and RD originate from unique cognitive mechanisms or not Multiple cognitive processes are shared between reading and mathematics Therefore impairments in any one of domain general skills could conceivably play an important role in both pure and comorbid conditions Moreover it has been suggested that phonological processing has a significant role in some aspects of numerical processing such as retrieval of arithmetical facts Education it will be interesting to look at the effect of interventions that aim to improve reading such as phonological awareness and there transfer effect on improving mathematical processing Alternatively it will be good to test whether math interventions will improve reading     The National Cyclopaedia of Useful Knowledge Charles Knight,1853     *Technical Abstract Bulletin* ,
