You must complete the quiz prior to midnight Sunday, Aug. 26.

- 1a) The summer squash has a white fruit color which is dominant over yellow fruit color. If a white fruit homozygous plant is crossed with a homozygous yellow fruit plant, what will the genotype of the first generation ( $F_1$ )?

C = White coloring; c = Yellow coloring  
CC crossed with cc

	C	C
c	Cc	Cc
c	Cc	Cc

The genotypes of the  $F_1$  generation will all be heterozygous (Cc).

- 1b) If the individuals from the  $F_1$  generation were allowed to fertilize one another, what is the expected genotypic and phenotypic ratios?

All  $F_1$  generation must be Cc

	C	c
C	CC	Cc
c	Cc	cc

The expected genotypic ratio would be 1:2:1 while the phenotypic ratio would be 3:1

- 2a) In the high pressure, deep, dark depths of the ocean's abyssal plains lives an organism called a viper fish. These fish resemble transparent eels with overlarge heads and very long, pointy teeth. Some of these fish can produce biochemical luminescence along the length of their bodies and some cannot. Also, some have very large eyes while others have almost no eyes at all. Assume that these two traits are each controlled by single separate genes with the production of bioluminescence (L) and large eyes (E) being dominant alleles for those traits. A female fish heterozygous for both traits happens to meet a male that is homozygous dominant for bioluminescence and homozygous recessive for eyes. List all the possible genotypes of their offspring.

Possible genotypes: LLEe, LLee, LLEe, LLeE

- 2b) What are the odds that any progeny will be bioluminescent with no eyes?

Mother = LLEe

Father = LLee

	LE	Le	LE	Le
Le	LLLe	LLee	LLLe	LLee
Le	LLLe	LLee	LLLe	LLee
Le	LLLe	LLee	LLLe	LLee
Le	LLLe	LLee	LLLe	LLee

Bioluminescent along length of their bodies and no eyes (LLLe or LLee) = 50%

Hermansen,2018-06-26 *Down from the Trees* Man's Amazing Transition from Tree Dwelling Ape Ancestors covers the evolution of man from tree dwelling ape to Homo sapiens as he is today Using easy to read language the author takes

complex jargon filled material and extracts the essence of the topic and conveys it in a clear and engaging manner. He approaches the subject of human evolution from three different disciplines: fossil evidence and its interpretation, evolutionary theory and its applicability, and genetic evidence and its ability to unlock prehistoric information. The third discipline has advanced unbelievably in the last few years, and this book includes the most up-to-date research. There is nothing more interesting to humans than the story of their origins. The evolutionary process of a tree-dwelling ape becoming a walking talking man who has developed the technology to walk on the moon, transplant hearts, or modify living things is no trivial story. This book provides a fascinating and comprehensive view of what science has learned of human evolution. **Organic**

*Machine Tool Reliability* Bhupesh K. Lad, Divya Shrivastava, Makarand S. Kulkarni, 2016-02-19. This book explores the domain of reliability engineering in the context of machine tools. Failures of machine tools not only jeopardize users' ability to meet their due date commitments but also lead to poor quality of products, slower production, down time, losses, etc. Poor reliability and improper maintenance of a machine tool greatly increases the life cycle cost to the user. Thus, the application area of the present book, i.e. machine tools, will be equally appealing to machine tool designers, production engineers, and maintenance managers. The book will serve as a consolidated volume on various dimensions of machine tool reliability and its implications from manufacturers' and users' point of view. From the manufacturers' point of view, it discusses various approaches for reliability and maintenance-based design of machine tools. In specific, it discusses simultaneous selection of optimal reliability configuration and maintenance schedules, maintenance optimization under various maintenance scenarios, and cost-based FMEA. From the users' point of view, it explores the role of machine tool reliability in shop floor level decision making. In specific, it shows how to model the interactions of machine tool reliability with production scheduling, maintenance scheduling, and process quality control.
