Harisinghani, 2024-11-01 This book offers a practical evidence based casebook on abdominal imaging As imaging is increasingly being used for most clinical scenarios referring physicians rely on radiologists to provide evidence based interpretation for the incidental and indication related findings seen on the imaging studies While imagers are trained in identifying the findings what makes a report more clinically relevant is the accurate assessment and a more focused differential based on knowing the pertinent evidence based data that supports one diagnosis over the other or favors benign over malignant etiology Imagers typically don t have this information readily available to them to provide and make a more informed impression of the findings seen For example if a hyperdense renal lesion with attenuation of 80 HU is seen on the noncontrast stone protocol CT it is important to know what is the likelihood this lesion is worrisome and if any further investigation is needed While this information is available it is scattered and one needs to acquire synthesize and collate this from the web This casebook overcomes this void by providing this information in a simplified case based template that any reader can then guickly reference and use in their day to day work In addition template language for dictation where relevant will be provided Cases are organized around major abdominal areas including bowel genitourinary tract and pancreas Each case also includes a table of pearls and pitfalls to be learned and applied to everyday practice This is an ideal quide for residents fellows and staff from radiology as a day to day resource or board review book Given the lack of a comprehensive text this will be useful to all cadres of radiologists Clinical Ultrasound Mark E Lockhart, Corinne Deurdulian, 2019-08-25 Section 1 Neck Carotid Thyroid 1 Carotid Stenosis 2 Carotid fistula 3 Carotid bulb tumor 4 Vertebral artery waveform subclavian steal 5Takayasu s Arteritis 6Reversed IJ due to innominate occlusion 7Thyroiditis with diffuse hyperemia 8Thyroid nodule with malignant features 9Abnormal adenopathy from lymphoma 10Parathyroid nodule 11Parotid nodule 12Parotid cystic disease Sjogren s Section 2 Liver 13Hepatic steatosis 14Cavernous hemangioma 15Hemangioma in background of fatty liver hypoechoic hemangioma 16Cirrhosis with portal hypertension 17HCC with tumor thrombus 18Cholangiocarcinoma 19Hilar cholangiocarcinoma 20Portal vein cavernoma mimicking cholangiocarcinoma 21Biliary cystadenoma 22Hepatic Abscess 23Caroli s Disease Complicated by Cholangitis 24Budd chiari 25TIPS Dysfunction 26Cavernous transformation 27Liver Transplant with hepatic artery stenosis 28Liver Transplant with biliary necrosis and HA occlusion 29Transplant with PTLD 30Polycystic liver disease 31Metastatic Disease Section 3 Spleen 32Metastases 33Hemangioma Section 4 Pancreas 34Pancreatic adenocarcinoma 35Acute Pancreatitis 36Chronic pancreatitis 37Gastroduodenal artery pseudoaneurysm in pancreatitis 38Cystic Fibrosis fatty infiltration 39Autoimmune pancreatitis
