Exploring World History through Geography Julie Crea Dunbar, 2022-09-29 Not your run of the mill world history tome this book takes readers on a fascinating journey through time to examine world history through the closely related discipline of geography From the early civilizations of ancient Mesopotamia to our present day globalized society readers will learn how humans interacted and still interact with the environment around them as well as the environment's role in not only shaping the society's world view but enabling the building of socially stratified and successful civilizations Additionally the book examines how civilizations interacted with others from developing cross boundary trade to initiating wars of expansion Finally readers will also understand the impact of the study and application of geography such as the creation and use of maps and the study of cultures and Earth's processes Readers will come away with a new understanding of the relevance of geography to not only human history but contemporary events as well as their day to day lives By presenting this history from a slightly different geographic point of view this book will inspire fresh curiosity in the world both past and present

Flattening the Earth John P. Snyder, 1997-12-05 Cartographers have long grappled with the impossibility of portraying the earth in two dimensions To solve this problem mapmakers have created map projections This work discusses and illustrates the known map projections from before 500BC to the present with facts on their origins and use

Mirror of the World Meg Roland, 2021-07-28 In the late fifteenth century the production of print editions of Claudius Ptolemy's second century Geography sparked one of the most significant intellectual developments of the era the production of mathematically based north oriented maps The production of world maps in England however was notably absent during this Ptolemaic revival As a result the impact of Ptolemy's text on English geographical thought has been obscured and minimalized with scholars speculating a possible English indifference to or isolation from European geographic developments Tracing English geographical thought through the material culture of literary and popular texts this study provides evidence for the reception and transmission of Ptolemaic based geography in England during a critical period of geographic innovation and synthesis one that laid the foundation for modern geographical representation With evidence from prose romance book illustration theatrical performance cosmological ceilings and almanacs **Mirror of the World** proposes a new interdisciplinary literary and cartographic history of the influence of Ptolemaic geography in England one that reveals the lively integration of geographic concepts through narrative and non cartographic visual forms

maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer s art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph [The Role of Maps in History: A Simple Guide to Big Ideas](#) Nova Martian,2025-05-03 Discover how maps have shaped our understanding of the world in The Role of Maps in History A Simple Guide to Big Ideas This accessible and comprehensive guide begins by unraveling the fundamental nature of maps and their profound significance throughout human civilization From ancient artifacts guiding early societies through maps as tools of power and knowledge to visual expressions that capture both myth and reality the book illustrates the pivotal role cartography has played in recording envisioning and influencing history Tracing developments across continents and eras the book explores mapping traditions from Babylonian clay tablets to the scientific breakthroughs of the Renaissance the navigational charts of the Age of Exploration and the rise of national mapping agencies Readers are invited to see how maps have not only propelled exploration and defined empires but also shaped borders guided policy and influenced everyday life Special attention is given to the use of maps in social movements the arts propaganda and justice demonstrating their power as instruments of persuasion protest and cultural memory Rounding out this engaging journey is an insightful examination of the digital transformation in cartography including Geographic Information Systems real time mapping and the implications of open data and citizen science Readers will gain critical skills for navigating modern maps and understanding their limitations biases and ethical quandaries Both a primer and a thought provoking reflection this book encourages us to recognize maps as living documents tools for thinking learning and participating in our ever changing world **Mapping Latin America** Jordana Dym,Karl Offen,2011-09-28 57 studies of individual maps and the cultural environment that they spring from and exemplify including one pre Columbian map **Ancient Perspectives** Richard J. A. Talbert,2014-02-14 Ancient Perspectives encompasses a vast arc of space and time Western Asia to North Africa and Europe from the third millennium BCE to the fifth century CE to explore mapmaking

and worldviews in the ancient civilizations of Mesopotamia Egypt Greece and Rome In each society maps served as critical economic political and personal tools but there was little consistency in how and why they were made Much like today maps in antiquity meant very different things to different people Ancient Perspectives presents an ambitious fresh overview of cartography and its uses The seven chapters range from broad based analyses of mapping in Mesopotamia and Egypt to a close focus on Ptolemy s ideas for drawing a world map based on the theories of his Greek predecessors at Alexandria The remarkable accuracy of Mesopotamian city plans is revealed as is the creation of maps by Romans to support the proud claim that their emperor s rule was global in its reach By probing the instruments and techniques of both Greek and Roman surveyors one chapter seeks to uncover how their extraordinary planning of roads aqueducts and tunnels was achieved Even though none of these civilizations devised the means to measure time or distance with precision they still conceptualized their surroundings natural and man made near and far and felt the urge to record them by inventive means that this absorbing volume reinterprets and compares

A History of the World in Twelve Maps Jerry Brotton,2012-09-06 Jerry Brotton is the presenter of the acclaimed BBC4 series Maps Power Plunder and Possession Here he tells the story of our world through maps Throughout history maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects world maps are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world whether the Jerusalem centred Christian perspective of the 14th century Hereford Mappa Mundi or the Peters projection of the 1970s which aimed to give due weight to the third world Although the way we map our surroundings is once more changing dramatically Brotton argues that maps today are no more definitive or objective than they have ever been but that they continue to make arguments and propositions about the world and to recreate shape and mediate our view of it Readers of this book will never look at a map in quite the same way again

Cartography Matthew H. Edney,2019-04-12 In his most ambitious work to date Edney questions the very concept of cartography to argue that this flawed ideal has hobbled the study of maps Susan Schulten author of A History of America in 100 Maps Over the past four decades the volumes published in the landmark History of Cartography series have both chronicled and encouraged scholarship about maps and mapping practices across time and space As the current director of the project that has produced these volumes Matthew H Edney has a unique vantage point for understanding what cartography has come to mean and include In this book Edney disavows the term cartography rejecting the notion that maps represent an undifferentiated category of objects for study Rather than treating maps as a single unified group he argues scholars need to take a processual approach that examines specific types of maps

sea charts versus thematic maps for example in the context of the unique circumstances of their production circulation and consumption To illuminate this bold argument Edney chronicles precisely how the ideal of cartography that has developed in the West since 1800 has gone astray By exposing the flaws in this ideal his book challenges everyone who studies maps and mapping practices to reexamine their approach to the topic The study of cartography will never be the same An intellectually bracing and marvellously provocative account of how the mythical ideal of cartography developed over time and in the process distorted our understanding of maps Times Higher Education Cartography The Ideal and Its History offers both a sharp critique of current practice and a call to reorient the field of map studies A landmark contribution K ren Wigen coeditor of Time in Maps
