[Life Adrift](#) Andrew Baldwin, Giovanni Bettini, 2017-05-24 Life Adrift critically engages with two of the most defining issues of our contemporary global political economy migration and climate change In

their own right both are discrete areas of politics theory practice and resistance But as climate and migration are increasingly imagined together as a singular relation they are giving rise to new horizons of meaning in politics philosophy media art and literature Life Adrift is a collection of essays from across the interpretive social sciences and humanities which treats climate change and migration as a relation that demands theoretical and historical explanation rather than a problem requiring technical and expert solutions The result is a unique collection offering readers a means for reconceptualising migration and environmental changes as a site of politics and of political possibility Along the way it addresses a range of topics current in cultural and political theory including democracy place neoliberalism humanism materiality borders affect race and sexuality If climate change stands to redistribute humans and material across the globe then Life Adrift offers a set of critical resources for analysing this coming phenomenon and reimagining what it might mean to be political in a fully immanent world of bodies in flux

Our Dynamic Earth: A Primer Matthew R. Bennett, 2022-01-18 Students taking undergraduate degrees in geography ecology earth science and environmental science frequently take an introductory unit in Physical Geography Some will have not done any geography since their early teens while others have more recent knowledge This range of backgrounds can be challenging for both the instructor and the student this primer aims to help A primer is a readable introduction to a subject more technical than a piece of popular science but less detailed than a specialist textbook It aims to give the reader a platform in a subject with which they may be unfamiliar so that they can proceed simultaneously or sequentially to more advanced texts and information Ideally the primer should have something for those without any knowledge while also challenge and entertaining those who do Not quite bedtime reading but a step in that direction Our Dynamic Earth introduces students to the Earth's origins to plate tectonics atmospheric and oceanographic circulation as well as to a range of Earth surface processes Idea to get you started in your studies

The Confines of Territory John Agnew, 2020-12-17 The word territory has taken on renewed significance in a world where its close association with state sovereignty has made a serious comeback invoked alike by proponents of Brexit in the UK Making America Great Again in the USA and myriad populists from India to Brazil by way of Italy and Hungary The word has had a contentious history in social science and political theory In its first seven years the journal Territory Politics Governance has published numerous articles examining the ways in which territory figures into contemporary political debates and its limits as a concept when applied to a world in which sovereignty never has simply pooled up within self evidently distinctive blocs of space named as territories Among other things the limits of territory are apparent in terms of the history of a global capitalism that always bursts beyond established boundaries the fact that some states are much more powerful and exercise much more spatial reach than do others and that the political uses of territory in its current usage date back predominantly to seventeenth century Europe rather than being historically transcendental or worldwide The articles in this book are selected from Territory Politics Governance to survey many of the dilemmas and questions that haunt the concept of territory even as its

Ontological Politics in a Disposable World Luigi Pellizzoni,2016-03-03 This book explores the intertwining of politics and ontology shedding light on the ways in which as our ability to investigate regulate appropriate enhance and destroy material reality have developed so new social scientific accounts of nature and our relationship with it have emerged together with new forms of power Engaging with cutting edge social theory and elaborating on the thought of Foucault Heidegger Adorno and Agamben the author demonstrates that the convergence of ontology with politics is not simply an intellectual endeavour of growing import but also a governmental practice which builds upon neoliberal programmes the renewed accumulation of capital and the development of technosciences in areas such as climate change geoengineering and biotechnology With shifts in our accounts of nature have come new means of mastering it giving rise to unprecedented forms of exploitation and destruction with related forms of social domination In the light of growing social inequalities environmental degradation and resource appropriation and commodification **Ontological Politics in a Disposable World** The New Mastery of Nature reveals the need for new critical frameworks and oppositional practices to challenge the rationality of government that lies behind these developments a rationality that thrives on indeterminacy and an account of materiality as comprised of fluid ever changing states simultaneously agential and pliable to which social theory increasingly subscribes without questioning enough its underpinnings and implications A theoretically sophisticated reassessment of the relationship between ontology and politics which draws the contours of a renewed humanism to allow for a more harmonious relationship with the world this book will appeal to scholars in social and political theory environmental sociology geography science and technology studies and contemporary European thought on the material world

Geomechanics and Geology J.P. Turner,D. Healy,R.R. Hillis,M. Welch,2017-09-19 Geomechanics investigates the origin magnitude and deformational consequences of stresses in the crust In recent years awareness of geomechanical processes has been heightened by societal debates on fracking human induced seismicity natural geohazards and safety issues with respect to petroleum exploration drilling carbon sequestration and radioactive waste disposal This volume explores the common ground linking geomechanics with inter alia economic and petroleum geology structural geology petrophysics seismology geotechnics reservoir

engineering and production technology Geomechanics is a rapidly developing field that brings together a broad range of subsurface professionals seeking to use their expertise to solve current challenges in applied and fundamental geoscience A rich diversity of case studies herein showcase applications of geomechanics to hydrocarbon exploration and field development natural and artificial geohazards reservoir stimulation contemporary tectonics and subsurface fluid flow These papers provide a representative snapshot of the exciting state of geomechanics and establish it firmly as a flourishing subdiscipline of geology that merits broadest exposure across the academic and corporate geosciences Handbook on the Geographies of Power Mat Coleman, John Agnew, 2018-07-27 The so called spatial turn in the social sciences means that many researchers have become much more interested in what can be called the spatialities of power or the ways in which power as a medium for achieving goals is related to where it takes place Most famous authors on the subject such as Machiavelli and Hobbes saw power as entirely equivalent to domination exercised by some over others Though this meaning is hardly redundant understandings of power have become more multidimensional and nuanced as a result of the spatial turn Much recent writing in human geography for example has rigorously extended use of the term power beyond its typical understanding as a resource that pools up in some hands and some places to a medium of agency that has different effects depending on how it is deployed across space and how actors cooperate or not to give it effect To address this objective the book is organized thematically into four sections that cover the main areas in which much of the contemporary work on geographies of power is concentrated bodies economy environment and energy and war
