Vanishing Frontiers Andrew Selee, 2018-06-05 There may be no story today with a wider gap between fact and fiction than the relationship between the United States and Mexico Wall or no wall deeply intertwined social economic business cultural and personal relationships mean the US Mexico border is more like a seam than a barrier weaving together two economies and cultures Mexico faces huge crime and corruption problems but its remarkable transformation over the past two decades has made it a more educated prosperous and innovative nation than most Americans realize Through portraits of business leaders migrants chefs movie directors police officers and media and sports executives Andrew Selee looks at this emerging Mexico showing how it increasingly influences our daily lives in the United States in surprising ways the jobs we do the goods we consume and even the new technology and entertainment we enjoy From the Mexican entrepreneur in Missouri who saved the US nail industry to the city leaders who were visionary enough to build a bridge over the border fence so the people of San Diego and Tijuana could share a single international airport to the connections between innovators in Mexico s emerging tech hub in Guadalajara and those in Silicon Valley Mexicans and Americans together have been creating productive connections that now blur the boundaries that once separated us from each other

Asia's New Geopolitics Desmond Ball, Lucie Béraud-Sudreau, Tim Huxley, C. Raja Mohan, Brendan Taylor, 2021-09-28 Intensifying geopolitical rivalries rising defence spending and the proliferation of the latest military technology across Asia suggest that the region is set for a prolonged period of strategic contestation None of the three competing visions for the future of Asian order a US led Free and Open Indo Pacific a Chinese centred order or the ASEAN inspired Indo Pacific Outlook is likely to prevail in the short to medium term In the absence of a new framework the risk of open conflict is heightened and along with it the need for effective mechanisms to maintain peace and stability As Asia s leaders seek to rebuild their economies and societies in the wake of COVID 19 they would do well to reflect upon the lessons offered by the pandemic and their applicability in the strategic realm The societies that have navigated the crisis most effectively have been able to do so by putting in place stringent protective measures Crisis management and avoidance

mechanisms and even in the longer term wider arms control can be seen as the strategic equivalent of such measures and as such they should be pursued with urgency in Asia to reduce the risks of an even greater calamity **Engineering**

Detter, Stefan Folster, 2017-07-18 How to leverage existing resources to meet the current and future needs of cities

Crumbling streets and bridges Poorly performing schools and inadequate social services These are common complaints in cities which too often struggle just to keep the lights on much less make the long term investments necessary for future generations It doesn't have to be this way This book by two internationally recognized experts in public finance describes a new way of restoring economic vitality and financial stability to cities using steps that already have been proven remarkably successful The key is unlocking social human and economic wealth that cities already own but is out of sight or hidden A focus on existing public wealth helps to shift attention and resources from short term spending to longer term investments that can vastly raise the quality of life for many generations of urban residents A crucial first step is to understand a city's balance sheet too few cities comprehend how valuable a working tool this can be With this in hand taxpayers politicians and investors can better recognize the long term consequences of political decisions and make choices that mobilize real returns rather than rely on more taxes debt or austerity Another hidden asset is real estate Even poor cities own large swathes of poorly utilized land or they control underperforming utilities and other commercial assets Most cities could more than double their investments with smarter use of these commercial assets Managing the city's assets smartly through the authors proposed Urban Wealth Funds at arm's length from short term political influence will enable cities to ramp up much needed infrastructure investments *Mission IAS - Prelim & Main Exam, Trends, How to prepare, Toppers' Interviews, Strategies, Tips & Detailed Syllabus 3rd Edition* Disha Experts, 2020-02-04

The Routledge Companion to Global Value Chains Renu Agarwal, Christopher Bajada, Roy Green, Katrina Skellern, 2021-09-30 This Companion provides a review of global value chains GVCs and the megatrends that are shaping them and will continue to reshape them in deep set trajectories of change over the next few decades Megatrends herald both challenges and opportunities With the growing interest among business leaders and researchers in GVCs this is a reference work which fills a gap in current literature by focusing on the new features of GVCs including the shift of global purchasing power towards developing economies the significance of emerging technologies and data analytics the increasing tensions between globalisation and de globalisation and the role of micro multinationals start up entrepreneurs the public sector and middle markets in a fast changing global economy The early chapters are essentially intradisciplinary in character with the first seeking to explore some historical aspects of GVCs

Subsequent chapters cover the theory and practice of operations and supply chain management emerging supply chain technologies and the impact of inter firm collaboration across sectors and economies The final chapters take a more interdisciplinary approach and examine topics at the interface of GVCs with the economy society culture and politics This comprehensive handbook provides a timely analysis of leading edge global megatrends and practices in one volume

Islamic Charity Samantha May, 2021-07-29 Since 9 11 and the global War on Terror practitioners of Islam in Europe and beyond have been scrutinised and surveyed under suspicion of disloyalty and as potential disrupters of national social cohesion Seemingly benign altruistic practices such as charity are viewed as potential threats to national security and have increasingly become subject to counter terrorism policies This work seeks to critically assess the assumptions behind the lesser known financial War on Terror through exploration of the effects of current policies on Muslim charitable practices in the UK The consequences of current policies are multi faceted from the stigmatization and suspicion of Muslim charities and communities individual loss of status and financial standing to a decrease of living standards and or loss of lives Engaging with the everyday socio political activities of Muslim individuals this book gives voice to the motivations apprehensions and challenges faced by Muslim charitable practitioners A must read for anyone wanting to challenge policy assumptions behind increased surveillance of charities and individual donors whilst outlining the repercussions of current policies on Muslim individuals and charities

Environmental Warfare in Gaza Shourideh C. Molavi, 2024-02-20 Almost entirely written before the catastrophic events of late 2023 this book anticipates them exposing the brutal history of crimes against trees plants and the people who live with them along the 300 mile border zone between Gaza and Israel as nothing less than 75 years of colonization Laura Kurgan Professor Columbia University A timely and very essential addition for understanding the multi layered story of Gaza and that of Palestine Beyond the familiar warfare in Gaza the book presents a unique tale of Israeli violence to reengineer the Palestinian environment Ahmad Amara lawyer and lecturer Al Quds University Provides a much needed historical context to understand unfolding events in light of the long history of Palestinian liberation struggles through the lens of environmental history Paulo Tavares architect and author The engineered perimeter around the occupied Gaza Strip is formed by a sophisticated system of fences forts and surveillance technologies With each Israeli incursion a military no go area or a buffer zone is established along its borders extending deep into Palestinian communities and farmlands in Gaza These practices reproduce Israel s eco colonial imaginary further compounding the Gaza Strip s isolation from the rest of Palestine Since 2014 the bulldozing of Palestinian lands by Israeli occupation forces has been complemented by the unannounced aerial spraying of military herbicides extending the reach of Israeli colonial violence into the realm of chemical warfare The spraying has destroyed entire swaths of arable land in Gaza contributing to decades long practices that have forcibly changed a once lush Palestinian landscape This book is a vivid document of this aspect of Israeli eco colonial warfare and the strategies of anti colonial resistance adopted by Palestinians in Gaza as a result It includes original maps

images and visualizations and collects new documents original archival materials stills of drone footage first hand testimonies of farmers organizers and protesters and documents affected vegetation in Gaza as silent witnesses to Israeli settler colonial violence Shourideh C Molavi is a writer and scholar specializing in citizenship statelessness and human rights She is the dedicated Palestine Israel researcher at Forensic Architecture an independent research agency based in London and teaches at the Institute for the Study of Human Rights at Columbia University She is the author of Stateless Citizenship The Palestinian Arab Citizens of Israel

educational research **The Injustice of Property** Stephen Przybylinski, 2025-06-01 With the rise of homelessness in many U S cities municipal governments are sanctioning organized encampments as an official strategy for sheltering unhoused people Examining the shortcomings and consequences of these municipal policies *The Injustice of Property* explores how unhoused individuals living in self managed encampments navigate and organize themselves within and against the confines of liberal property systems Through ethnographic research in Portland Oregon a paradigmatic city in advancing this model of homeless shelter Stephen Przybylinski details the everyday struggles of self managed encampments to highlight how key contradictions inherent to liberal ideology maintain property as a means of structuring sociopolitical equality He argues that justice cannot be realized for unhoused communities within the liberal model of private property due to how liberalism and liberal ideology prioritize the rights and values of property over the personal rights of self governance *The Injustice of Property* is a conceptually robust and empirically rich account of the limits of liberal thinking regarding what just property relations look like for unhoused and housed people alike The book shows that while encampment communities struggle to establish alternative property relationships to the traditional model of private ownership the injustices that residents of encampments face provoke a necessary reevaluation of how beneficiaries of property systems influence who can become housing stable and on which terms This insightful book reveals how the injustices surrounding Portland s encampment communities reflect the limits and injustice of liberal property more broadly *The European Union and the Black Sea* Sinem Akgul Acikmese, Dimitrios Triantaphyllou, 2017-10-02 The idea for this book is derived from the scantiness of academic references on the European Union s policies towards the Black Sea relative to this region s officially stated significance for the EU Even though the EU plays a vital role in Black Sea political agendas the EU s cooperation with the region is not extensively covered by academic discussions and literature This is mostly due to the fact that the EU s focus on foreign affairs is mainly associated with the Balkans as part the current and potential expansion and the Middle East as a direct consequence of the upheaval of the Arab Spring The Black Sea region is crucially important for the EU because of the opportunities and challenges that the region presents both politically and socio economically Contributions to this book mostly focus on specific issues of EU Black Sea cooperation from conflict to the environment to democracy and how these particular relationships are perceived within the region as well as through the lenses of stakeholders such as Russia Turkey and the USA Overall the collection focuses on projecting a more efficient role and a holistic strategy for the EU in its approach towards the Black Sea region testifying to the need for a strong EU presence For this reason the Black Sea area remains the neighbourhood too close to yet still far from the European Union This book was originally published as a special issue of the *Journal of Balkan and Near Eastern Studies* *Why Women Will Save the Planet* Friends of the Earth, C40 Cities, 2018-03-01 Big cities don t have to mean a dystopian future They can be turned around to be powerhouses of well being and environmental sustainability if we empower women This book is a unique collaboration between C40 and Friends

of the Earth showcasing pioneering city mayors key voices in the environmental and feminist movements and academics The essays collectively demonstrate both the need for women s empowerment for climate action and the powerful change it can bring A rallying call for the planet for women for everyone China's Economy Iris Claus,Les Oxley,2015-02-16 This collection of critical surveys provides readers with a range of up to date work from leading scholars in the area writing on some of the key issues facing China as they survey the present and future challenges of the Chinese economy Nine papers provide detailed discussion on key aspects of the past present and future of the Chinese economy Leaders in their relevant fields of scholarship tackle some of the critical issues facing China Contributors identify common themes including the household registration system urbanization demographic transition inequality and the sustainability of economic growth Articles provide a critical review of the literature and discuss policy implications and areas for future research
