Teaching Disciplines and Contexts Linda Hobbs, Raphaela Porsch, 2022-02-18 This edited book is a compilation of research by the members of the Out of Field Teaching Across Specialisations OOF TAS Collective and is the second book by the Collective. It extends from the work begun in the 2019 book *Examining the Phenomenon of Teaching Out of Field* by showcasing the broad range of research agendas and findings relating to this phenomenon internationally. This book provides research and commentary relating to the out of field teaching phenomenon in primary secondary and tertiary education and across different subjects. It provides snapshots of the effects, causes, measurement and other characteristics of out of field teaching in and across contexts including states and countries, school types and school levels, subjects and specializations. The different chapters provide commentary at different units of analysis and focus on the effects of out of field teaching for teachers and their students, the school contexts, cultures that do or do not support them, the leadership practices that assign the teachers to out of field subjects and the systems that create/perpetuate the need for out of field teaching assignments. Choice and Control in American Education John F. Witte, William H. Clune, 1990 Taking Charge of Professional Development Joseph H. H. Semadeni, 2010-06-06 How can every teacher, school and district improve the quality of their schools? The answer is to empower teachers to take charge of their own learning, says author and teacher Joseph H. Semadeni. In this book you will learn how the Fusion professional development model can help you do just that. This accessible, customizable and affordable model gives you proven ways to successfully establish teaching and learning practices that are grounded in solid educational research. In some schools you may wish to begin the program with just a few teachers and let it gain recognition, support and buy-in from the biggest skeptics. In other schools the whole staff may be inspired to create their own lists of best practices, funding levels and new school day schedules. In both scenarios schools have successfully implemented Fusion where it was

needed the most What s most appealing to teachers is that this approach gives them the chance to determine what strategies they want to learn how much professional development they want to access and when it best fits their schedules As teachers learn use observe and are observed practicing the strategies in their classrooms they determine which practices best fit their students and foster achievement With experience teachers become eligible for related pay increases and Fusion helps teachers to foster the qualities attitudes and behaviors necessary to establish and nurture a collaborative culture within the school community
