LOITASA Research in Progress Birgit Brock-Utne, Zubeida Desai, Martha A. S. Qorro, 2005 *English as a Language of Learning, Teaching and Inclusivity* Liesel Hibbert, 2023-08-18 Hibbert explores South Africa's higher education crisis utilising case studies and first hand experiences with English as the language of instruction. The historical overview provides a framework with which to understand the complicated nature of using English as a language of instruction in South Africa past and present. Student narratives are presented to illustrate mainly breakthroughs but also challenges. An overview is provided of imported English teaching methodologies and how they have emerged and developed in the local educational system over decades. It is demonstrated how these methodologies relate to socio-economic and political events and trends at each juncture. By applying defamiliarisation as a research method of investigation students translanguageing struggles are recorded and discussed both pre-pandemic and in the pandemic period. The experiences of non-monolingual English speaking staff and students and of local English African language bilinguals is foregrounded as they are by far the majority in South African higher education and schools. The relevance of the experiences and learning paths of those staff and students is enhanced. This book aids lecturers across disciplines and English language facilitators in the improvement of English acquisition curricula through exposure to arguments, case studies and learning path narratives in this volume and prompts and inspires researchers to develop further theories and experiments in their own context.

Neuroscience in Africa Nilesh B. Patel, Vivienne A. Russell, Nouria Lakhdar-Ghazal, 2019-06-28 This Research Topic covers some of the latest research on brain and behavior in health and disease in Africa. With its untapped resources and unique situations Neuroscience in Africa has the potential to contribute to a better understanding of human brain function both in health and disease. The diverse African fauna display a range of specializations in brain structure function relationships as a result of adaptations to the environment. Exploration of these may lead to insights into coping strategies which could be extrapolated to humans. Africa's unique flora is being investigated for anti-inflammatory, antinociceptive, antioxidant, antiepileptogenic and neuroprotective properties to determine its potential for use in the treatment of human brain disorders. There is also research on neurodegenerative and infectious diseases not only common to the global world but also neglected tropical diseases and conditions which provide unique avenues of investigations in basic and translational neuroscience on highly debilitating disorders and on the effects of pathogens and environmental toxins.

Physical and Symbolic Borders and Boundaries and How They Unfold in Space Basak Tanulku, Simone Pekelsma, 2024-03-05 This book critically examines how borders and boundaries physical and symbolic unfold in different geographies and spaces. It aims to understand why they exist and how they are constructed, deconstructed and reconstructed. The book explores why certain borders/boundaries persist while others are removed and new ones are erected. It does not focus on one form of border/boundary or geographic location.
