Memory and Social Movements in Modern and Contemporary History Stefan Berger, Christian Koller, 2024-04-29 Reflecting the growing interest of historians in memory studies this edited collection examines the relationship between memory and global social movements from 1848 to the present For a long time there has been little attempt by historians to consider memory and social activism in an integrated systematic and comparative way However in recent years scholars have demonstrated that social movements rely on collective memories to assert claims mobilize supporters and legitimize their political visions while also helping to further shape collective memories This book delves into the synergies between memory studies and social movements exploring how social movements have been constructing and creating memories of their own activity how specific landscapes of memory have influenced social movements and how activists have used memory as a cultural resource to further their own goals and ambitions The case studies presented cover a range of different types of political activism including the fights for workers gay feminist and pacifist rights as well as ecological urban and far right movements across the globe portraying the diverse interrelations that exist between social movements and collective memory
