

HATCHET

7 TIPS FOR WILDERNESS SURVIVAL

01 Tell Before You Go - Before going out into the wilderness, make sure you tell someone where you are going, and when you plan to be back. That way, if you do not return at the specified time, they know where to send someone to look for you.

02 Don't Panic - Panic is more dangerous than anything else in a survival situation. It is irrational, and the very first rule should be to keep your mind. The first 10 minutes of being lost are often when survival instincts make their clearest mistakes. Take deep breaths, assess the situation, and try your best to remain calm.

03 Stay in One Place - By staying in one place, you will increase your chances of being found, and will also conserve your energy to survive by reducing the energy your body expends - this will decrease the amount of food and water your body needs.

WILDERNESS SURVIVAL GUIDE

The Wilderness Committee is giving an award out to people who have been called upon to help in wilderness survival when alone in the wild. Based on Brian's actions in the story, do you think he is worthy of the award? Explain.

04 Find or Create Shelter - To prevent yourself from being completely exposed to the elements, you will need to build or find shelter. Exposure can lead to hypothermia or heat stroke, depending on the weather. If you are not properly dressed for the conditions, this is even more important. The Mountain Society has built 222 huts in winter that it does in the - story dry.

05 Find Water - In a survival situation, you can last up to three days without water. Because of this, you will want to make finding water a top priority. Your compass will help you by bringing it to a rolling bowl over to find for three minutes.

06 Build a Fire - You will need to build a good sized fire, with enough coals to stay hot for several hours. The fire will keep you warm, give you the ability to boil water and cook food. Keep your fire going, and it will keep wild animals off guard. You will want to make sure you have plenty of dry wood.

07 Find Food - Unless it is very cold, most healthy adults can live up to three weeks without food. Make sure you know the signs of food before you eat it. It is better to be hungry and healthy than to be full and sick. Survival food is not very high in protein - just make sure you cook them first.
