

1. The first step is to identify the problem. This involves understanding the symptoms and the context in which they are occurring.

2. The next step is to gather information. This can be done through interviews, observations, and research.

3. Once the information is gathered, the next step is to analyze it. This involves looking for patterns and identifying the root cause of the problem.

4. The final step is to develop a solution. This involves creating a plan of action and implementing it.
