The big picture comprehensive nature of the NAB Engineering Handbook will appeal to all broadcast engineers everyone from broadcast chief engineers who need expanded knowledge of all the specialized areas they encounter in the field to technologists in specialized fields like IT and RF who are interested in learning about unfamiliar topics. Chapters are written to be accessible and easy to understand by all levels of engineers and technicians. A wide range of related topics that engineers and technical managers need to understand are covered including broadcast documentation, FCC practices, technical standards, security, safety, disaster planning, facility planning, project management and engineering management.

Design Computing Brian Johnson, 2016-11-18. Design Computing will help you understand the rapidly evolving relationship between computing designers and the many different environments they create or work in. The book introduces the topic of design computing and covers the basics of hardware and software so you don't need to be an expert. Topics include the fundamentals of digital representation, programming and interfaces for design, the shifting landscape of opportunity and expectation in practice and pedagogy, placing sensors in buildings to measure performance and the challenge of applying information effectively in design. The book also includes additional reading for those who wish to dig deeper into the subject. Design Computing will provide you with a greater awareness of the issues that permeate the field, opportunities for you to investigate and perhaps motivation to push the boundaries.
