

What is the world made of?

Elementary Science

Big Idea: Solids, liquids, and gas is all matter with different properties.

Grade Level: Third

Rationale: I am teaching this lesson so students will understand that different types of matter have different properties. Students are learning this material so that they will be able to explain in their own words the properties of matter. This connects to their lives because our world is made up of matter.

NC Essential Standard(s): 3.P.2.2 Compare solids, liquids, and gases based on their basic properties.

Next Generation Science Standard(s):

2-PS1-1. Plan and conduct an investigation to describe and classify different kinds of materials by their observable properties. [Clarification Statement: Observations could include color, texture, hardness, and flexibility. Patterns could include the similar properties that different materials share.]

Instructional Objective: Students will be able to compare solids, liquids, and gases based on their basic properties. Students will be able to name one basic property for solids, liquids and gases. Students will be able to point out objects of matter that they see in everyday life and will be able to compare the objects.

Prerequisite knowledge and skills: Students will already know that matter takes up space and can be presented in different forms. Students will know that matter can be a solid, a liquid, or a gas.

Everyday Matters in Science and Mathematics Ricardo Nemirovsky, Ann S. Rosebery, Jesse Solomon, Beth Warren, 2004-12-13 This book re examines the dichotomy between the everyday and the disciplinary in mathematics and science education and explores alternatives to this opposition from points of view grounded in the close examination of complex classroom events It makes the case that students everyday experience and knowledge in their entire manifold forms matter crucially in learning sciences and mathematics The contributions of 13 research teams are organized around three themes 1 the experiences of students in encounters with everyday matters of a discipline 2 the concerns of curriculum designers including teachers as they design activities intended to focus on everyday matters of a discipline and 3 the actions of teachers as they create classroom encounters with everyday matters of a discipline As a whole the volume

reflects the shift in the field of educational research in recent years away from formal structural models of learning toward emphasizing its situated nature and the sociocultural bases of teaching and learning. At least two trends increasing awareness that formal theories can be useful guides but are always partial and provisional in how they disclose classroom experiences and the widespread availability of video and audio equipment that enables effortless recording of classroom interactions have reoriented the field by allowing researchers and teachers to look at learning starting with complex classroom events rather than formal theories of learning. Such examinations are not meant to replace the work on general theoretical frameworks but to ground them in actual complex events. This reorientation means that researchers and teachers can now encounter the complexity of learning and teaching as lived human meaning making experiences. Immersion in this complexity compels rethinking assumptions about the dichotomies that have traditionally organized the field's thinking about learning. Further, it has important implications for how the relationship between theory and practice in understanding teaching and learning is viewed. *Everyday Matters in Science and Mathematics Studies of Complex Classroom Events* is an important resource for researchers, teacher educators, and graduate students in mathematics and science education and a strong supplemental text for courses in these areas and also in cognition and instruction and instructional design.

Interplay of Creativity and Giftedness in Science Melissa K. Demetrikopoulos, John L. Pecore, 2015-12-17 This book explores education for juvenile offenders in relation to Passages Academy, which is both similar to and representative of many school programs in juvenile correctional facilities. Examining the mission and population of this school contributes to an understanding of the ways in which the teachers think about and ultimately act with respect to their detained juveniles, students, and particularly illustrates how the tension between punishment and rehabilitation is played out in school policies and design. By calling attention to the decisions that surround juvenile detention education, the extant research concentrates on three main areas: first, the social, political, and pedagogical forces that determine who enters the juvenile justice systems; second, how these court-involved youths are educated while they are in the system; and third, the practical problems and the social justice issues youths encountered when transitioning back to their community schools. *I Hope I Don't See You Tomorrow* is both heartwarming and heartbreaking; its vast empathy for the students that L. A. Gabay teaches is edifying, while its unsparing examination of the forces that push youth into detention is soul shearing. Gabay is at once Tocqueville and Kozol; he brilliantly guides us through the educational territory that is foreign to most of us, even as he paints a searing portrait of teachers who shape lesson plans for students who must learn under impossible conditions. Gabay's haunting and eloquent missive from the front lines of pain and possibility couldn't be more timely as the nation's first black president seeks to lessen the stigma of nonviolent ex-offenders in our society. Gabay's book confronts the criminal justice system at its institutional roots in the economic misery and racial strife of schooling that compounds the suffering of poor youth as they are contained by a state that often only pays attention to them when they are in trouble. Gabay opens eyes and vexes minds with this

stirring and sober account of what it means to teach those whom society has deemed utterly expendable Michael Eric Dyson author of *The Black Presidency Barack Obama and the Politics of Race in America* As a beneficiary of Lee Gabay and his colleague's patience discipline and compassionate teaching at the school this timely book beautifully decrypts the pedagogical framework within the juvenile justice system As America comes to term with its zeal for incarceration policymakers educators government officials parents and advocates should take advantage of this carefully written book and use it as reflection and pause as we prepare our young court involved students towards adulthood Jim St Germain Advisory counsel on President Obama's Taskforce on Police Community Relations and Mayor Bloomberg's Close to Home initiative
