Bakker,R. Mugge,2017-11-14 Product lifetimes are critical for the circular economy resource efficiency waste reduction and low carbon strategies for sustainability and are therefore of interest to academics from many different disciplines as well as original equipment manufacturers OEMs and other stakeholders The challenges related to product lifetimes must be tackled from multiple perspectives making the sharing of knowledge and expertise from different disciplines particularly important This book presents papers from the second Product Lifetime and the Environment PLATE conference held in Delft the Netherlands in November 2017 The

conference originated from the desire to bring together academic researchers working in the field of sustainability to benefit from each other's knowledge and further advance the field. The book includes the 88 full papers delivered at the conference grouped according to the following 7 conference themes: design for product longevity, product lifetime optimization, cultural perspectives on the throwaway society, circular economy and product lifetimes, business opportunities, economic implications and marketing strategies, consumer influences on product lifetimes and policy regulation and legislation. The book will be of interest to all those concerned with sustainable consumption, circular economy and resource efficiency. **Paper**, 1980

Governments around the world. This volume answers these questions on the basis of detailed and rigorous case studies of trade disputes between the United States, Japan and Europe in aircraft, semiconductors, supercomputers, telecommunications and other electronics products. Tyson proposes a cautious activist policy agenda to promote US competitiveness in high technology sectors and to strengthen multilateral rules governing high technology trade.
