Coinciding with the increased need to juggle a variety of tasks, technologies, ebooks and databases, the new Association of College Librarians has been connected to various religious traditions in a wide variety of ways for centuries, most notably Buddhism. In the latter part of the 20th century, however, a secular version was popularized largely by the work of Jon Kabat Zinn and his work on MBSR (Mindfulness Based Stress Reduction) at the University of Massachusetts's Medical School. The medical benefits and the overall quality of life improvements from its adoption have exploded in recent years; in particular, the last two decades, which have seen mindfulness traditions incorporated into education to a greater degree and with very positive results. Presents the only current LIS book that covers this topic in a way that applies directly to librarians. Provides a topic that will be appealing to librarians as it speaks to the pressures of budget cuts and consumer culture being felt across the academy. Seeks to improve the joy and quality of life that librarians and library science students experience in their personal lives and jobs. **Learning and Diversity in the Cities of the Future** Ilona Buchem, 2014. This publication includes the Proceedings of the PLE Conference 2013. The Conference on Personal Learning Environments is now an established annual international scientific event and a reference point for the current state of the art in research and development in Personal Learning Environments (PLE). The PLE Conference creates a space for researchers and practitioners to share concepts, case studies and research related to the design, development and implementation of Personal Learning Environments in diverse educational contexts, including formal and informal education. The 4th PLE Conference in 2013 took place at Beuth University of Applied Sciences in Berlin, Germany, together with a parallel event at Monash University in Melbourne, Australia. The PLE Conference 2013 received 75 submissions and welcomed almost 100 delegates from Europe, Asia, Australasia, North and South America and Africa. The papers included in the Proceedings provide rich and valuable theoretical and empirical insights into Personal Learning Environments. Personal Learning Environments (PLE) is an approach in Technology Enhanced Learning (TEL) based on the principles of learner autonomy, ownership and empowerment. PLEs are integrated individual environments for learning which include specific technologies, methods, tools, contents, communities and services, constituting complex learning infrastructures enhancing new educational practices and, at the same time, emerging from these new practices. This represents a shift away from the traditional model of technology enhanced learning based on knowledge transfer towards a model based on knowledge construction and sharing. **Digital and Media Literacy** Renee Hobbs, 2011-07-12. Leading authority on media literacy education shows secondary teachers how to incorporate media

literacy into the curriculum teach 21st century skills and select meaningful texts Reading Empirical Research Studies
 John R. Hayes, Richard E. Young, Michele L. Matchett, Maggie McCaffrey, Cynthia Cochran, 2020-10-07 For the most part those who teach writing and administer writing programs do not conduct research on writing Perhaps more significantly they do not often read the research done by others because effective reading of articles on empirical research requires special knowledge and abilities By and large those responsible for maintaining and improving writing instruction cannot without further training access work that could help them carry out their responsibilities more effectively This book is designed as a text in graduate programs that offer instruction in rhetoric and composition Its primary educational purposes are to provide models and critical methods designed to improve the reading of scientific discourse to provide models of effective research designs and projects appropriate to those learning to do empirical research in rhetoric Aiming to cultivate new attitudes toward empirical research this volume encourages an appreciation of the rhetorical tradition that informs the production and critical reading of empirical studies The book should also reinforce a slowly growing realization in English studies that empirical methods are not inherently alien to the humanities rather that methods extend the power of humanist researchers trying to solve the problems of their discipline **The Papers of the ... SIGCSE Technical Symposium on Computer Science Education** ,1986 **Sixteen Teachers Teaching** Patrick Sullivan, 2020-12-01 Sixteen Teachers Teaching is a warmly personal full access tour into the classrooms and teaching practices of sixteen distinguished two year college English professors Approximately half of all basic writing and first year composition classes are now taught at two year colleges so the perspectives of English faculty who teach at these institutions are particularly valuable for our profession This book shows us how a group of acclaimed teachers put together their classes design reading and writing assignments and theorize their work as writing instructors All of these teachers have spent their careers teaching multiple sections of writing classes each semester or term so this book presents readers with an impressive and perhaps unprecedented abundance of pedagogical expertise teaching knowledge and classroom experience Sixteen Teachers Teaching is a book filled with joyfulness wisdom and pragmatic advice It has been designed to be a source of inspiration for high school and college English teachers as they go about their daily work in the classroom Contributors Peter Adams Jeff Andelora Helane Adams Androne Taiyon J Coleman Renee DeLong Kathleen Sheerin DeVore Jamey Gallagher Shannon Gibney Joanne Baird Giordano Brett Griffiths Holly Hassel Darin Jensen Jeff Klausman Michael C Kuhne Hope Parisi and Howard Tinberg *Experiences and Research on Enhanced Professional Development Through Faculty Learning Communities* Blankenship, Rebecca J., Wiltsher, Cheree Y., Moton, Brandon A., 2022-06-24 Faculty learning communities are a fairly new ideology that is gaining traction among educators and institutions These communities have numerous benefits on professional development such as enhancing educator preparedness and learning The possibilities of these communities are endless however further study is required to understand how these learning communities work and the best practices and challenges they face Experiences

and Research on Enhanced Professional Development Through Faculty Learning Communities shares the experiences and research related to the enhanced professional development received by university faculty and staff participating in a series of collaborative faculty learning communities. The book, using qualitative, quantitative, and mixed methodologies, considers educator experiences as participants in the faculty learning communities, what they learned, and how they applied and implemented best practices in their courses. Covering topics such as curricula, course design, and rubrics, this reference book is ideal for administrators, higher education professionals, program developers, program directors, researchers, academicians, scholars, practitioners, instructors, and students.
