

Expository Writing Lesson: 1-Sentence

Setting When? Where?	Subject Who or What is the Information About?	Big Idea What about Why is it important?
 stormy	 tall majestic	  Flows, slides, moves
 Landforms Change		
<p>During stormy weather in the tall mountains, sediment flows, slides, and moves down the hillsides causing the landforms to change.</p>		

One Sentence: Primary Level

Purpose: This is the first organizer that primary-level writers (first grade-second grade) utilize to write an expository sentence that includes a setting, subject and big idea(topic sentence). The organizer displays the formula (setting, subject, big idea) and four boxes for planning ideas and recording fancy words. The lines below the boxes are for students to write their powerful sentences.

Directions:

Step 1: Plan: Students identify the subject of their sentence by asking: *Who or what is the information about?* Students draw a picture or write their subject in the box below the heading, "Subject". (See "sediment" in the example above.)

Step 2: Plan: The big idea is the reason for writing the information and why it is important.

Reason or Purpose: The big idea is the reason for writing the information. Although there are four different categories for purpose (inform, explain, describe, or analyze), primary grade students should only use the first two: 1) to inform, or 2) to explain. Students identify the big idea by asking: *What about sediment? Am I going to inform my audience about different types of sediment; or explain how sediment changes things?* (Explain how sediment changes things.) Students draw a picture in the box that shows their purpose, what information is being reported about sediment.

Importance of Information: The audience needs to understand why the information is important to read. Once the reason or purpose of the writing is identified, the student s then tell why or how the information is important; or make a claim about the information; or show the effects or impact of the information. (Tell the effects of sediment. It changes landforms.)

Step 3: Plan: Students identify the setting by asking: *When is this happening and where?* Students draw pictures in the boxes. (Please note: setting is only recorded if it makes sense.)

Step 4: Talk: Students practice forming a sentence using the pictures for support: *During bad weather in the mountains, sediment goes down the hillsides causing change.*

Step 5: Plan: Students record fancy words in each of the boxes, then practice retelling their sentences including the fancy words: *During stormy weather in the tall mountains, sediment flows, slides, and moves down the hillsides causing the landforms to change.*

Step 6: Talk and Write: When student are able to tell their sentences, they then write them down.

Six Issues Facing Libraries Today John M. Budd, 2017-06-13 This book addresses some of the most pressing issues in library and information science. It offers informed insight and perspectives on six essential and timely questions facing the profession: What is information? What is information literacy? What roles do academic libraries play in higher education today? How can we effectively educate librarians? What are the ethical and moral bases of the library and information professions? What is the future of librarianship? Written by John M. Budd, one of librarianship's most respected educators and the author of twelve previous books and copublished with Beta Phi Mu, the International Honor Society for librarianship, this is sure to become one of the profession's most talked-about books.

On the Cognitive, Ethical, and Scientific Dimensions of Artificial Intelligence Don Berkich, Matteo Vincenzo d'Alfonso, 2019-01-28 This edited volume explores the intersection between philosophy and computing. It features work presented at the 2016 annual meeting of the International Association for Computing and Philosophy. The 23 contributions to this volume neatly represent a cross section of 40 papers, four keynote addresses, and eight symposia as they cut across six distinct research agendas. The volume begins with foundational studies in computation and information epistemology and philosophy of science and logic. The contributions next examine research into computational aspects of cognition and philosophy of mind. This leads to a look at moral dimensions of man-machine interaction as well as issues of trust, privacy, and justice. This multi-disciplinary or better yet a disciplinary investigation reveals the fruitfulness of erasing distinctions among and boundaries between established academic disciplines. This should come as no surprise. The computational turn itself is a disciplinary and no former discipline, whether scientific, artistic, or humanistic, has remained unchanged. Rigorous reflection on the nature of these changes opens the door to inquiry into the nature of the world, what constitutes our knowledge of it, and our understanding of our place in it. These investigations are only just beginning. The contributions to this volume make this clear; many encourage further research and end with open questions.

Modeling and Using Context Paolo Bouquet, Luciano Serafini, Patrick Brézillon, Massimo Benerecetti, Francesca Castellani, 2003-07-31 This volume contains the papers presented at the Second International and terdisciplinary Conference on Modeling and Using Context CONTEXT 99 held in Trento Italy from 9 to 11 September 1999 CONTEXT 99 is the second in the CONTEXT series The rst was held in Rio de Janeiro Brazil in 1997 The CONTEXT conference series is meant to provide an interdisciplinary forum where researchers can exchange ideas methodologies and results on context and is increasingly becoming an important reference for all people doing research on context This is testified by the larger number of research areas that are represented at CONTEXT 99 in particular Philosophy

and Cognitive Psychology were not significantly present at the first conference and by the number and quality of submitted papers. Specifically, we received 118 papers, mostly of good or excellent quality. Among them, 33 (28%) have been accepted as full papers and 21 as short papers. We think it is fair to say that the 54 papers collected in this volume provide a significant picture of the international research on context currently going on. The notion of context plays an important role in many areas, both theoretical and applied, such as Formal Logic, Artificial Intelligence, Philosophy, Pragmatics, Computational Linguistics, Computer Science, Cognitive Psychology.

The Pragmatics of Discourse Coherence Helmut Gruber, Gisela Redeker, 2014-11-15 Over the past four decades, discourse coherence has been studied from linguistic, psycholinguistic, computational, and applied perspectives. This volume identifies current issues and under-researched topics in the pragmatics of discourse coherence. Nine studies from various disciplines address the realization and signalling of coherence relations in various genres and languages, their acquisition and use by first and second language learners and university students, the relationship between coherence relations and genre-specific discourse structure, and extensions of the coherence paradigm to multimodal discourse and visual art. This collection will be of interest to researchers from linguistics, applied linguistics, psychology, communication, and multimodal semiotics.
