Feenstra, Alan M. Taylor, 2014-09-19 Developed in the classroom by two of the most prominent researchers in the

field Feenstra and Taylor's International Economics is a modern textbook for a modern audience. Most international economics textbooks emphasize theory and the economies of advanced countries. Feenstra and Taylor's text anchors theoretical coverage to empirical evidence throughout while reflecting the realities of the global economy by covering emerging markets and developing countries. India, China, Southeast Asia. The new edition has been thoroughly updated including the latest on the Eurozone crisis.

Advanced International Trade Robert C. Feenstra, 2015-11-10 Trade is a cornerstone concept in economics worldwide. This updated second edition of the essential graduate textbook in international trade brings readers to the forefront of knowledge in the field and prepares students to undertake their own research. In *Advanced International Trade*, Robert Feenstra integrates the most current theoretical approaches with empirical evidence and these materials are supplemented in each chapter by theoretical and empirical exercises. Feenstra explores a wealth of material such as the Ricardian and Heckscher-Ohlin models, extensions to many goods and factors, and the role of tariffs, quotas, and other trade policies. He examines imperfect competition, offshoring, political economy, multinationals, endogenous growth, the gravity equation, and the organization of the firm in international trade. Feenstra also includes a new chapter on monopolistic competition with heterogeneous firms with many applications of that model. In addition to known results, the book looks at some particularly important unpublished results by various authors. Two appendices draw on index numbers and discrete choice models to describe methods applicable to research problems in international trade. Completely revised with the latest developments and brand new materials, *Advanced International Trade* is a classic textbook that will be used widely by students and practitioners of economics for a long time to come.

Updated second edition of the essential graduate textbook. Current approaches and a new chapter on monopolistic competition with heterogeneous firms. Supplementary materials in each chapter. Theoretical and empirical exercises. Two appendices describe methods for international trade research.

Consumer Price Index Manual International Labour Office, 2004-08-25 The consumer price index (CPI) measures the rate at which prices of consumer goods and services change over time. It is used as a key indicator of economic performance as well as in the setting of monetary and socio-economic policy such as indexation of wages and social security benefits, purchasing power parities, and inflation measures. This manual contains methodological guidelines for statistical offices and other agencies responsible for constructing and calculating CPIs and also examines underlying economic and statistical concepts involved. Topics covered include expenditure weights, sampling, price collection, quality adjustment, sampling price indices, calculations, errors and bias, organisation and management, dissemination, index number theory, durables and user costs.

Export and Import Price Index Manual: Theory and Practice OECD, International Labour Office, International Monetary Fund, Statistical Office of the European Communities, United Nations, The World Bank, 2010-04-06 A joint production by six international organizations, this manual explores the conceptual and theoretical issues that national statistical offices should consider in the daily compilation of export and import price indices. Intended for

Hollweg,Veronika Zavacka,2015-01-15 This Toolkit provides a framework guidelines and set of practical tools to conduct an analysis and diagnostic of trade competitiveness in the services sector and to identify both the main constraints to improved competitiveness and the appropriate policy responses *Consumer Price Index Manual* International Monetary Fund,International Labour Office,Statistical Office of the European Communities,United Nations Economic Commission for Europe,Organisation for Economic Co-operation and Development,World Bank,2025-06-30 The Theory publication and the companion on the practice of compiling consumer price indices CPIs is jointly published by the member agencies of the Inter Secretariat Working Group on Price Statistics IWGPS the Statistical Office of the European Union Eurostat the International Labour Organization ILO the IMF the Organisation for Economic Cooperation and Development OECD the United Nations Economic Commission for Europe UNECE and the World Bank The IMF managed the update of the Theory publication and the CPI Manual Drafting of this publication was led by Erwin Diewert with support from various authors The Theory publication will be translated into Spanish French Arabic and Russian **Big Data for Twenty-First-Century Economic Statistics** Katharine G. Abraham,Ron S. Jarmin,Brian C. Moyer,Matthew D. Shapiro,2022-03-11 The measurement infrastructure for the production of economic statistics in the United States largely was established in the middle part of the 20th century As has been noted by a number of commentators the data landscape has changed in fundamental ways since this infrastructure was developed Obtaining survey responses has become increasingly difficult leading to increased data collection costs and raising concerns about the quality of the resulting data At the same time the economy has become more complex and users are demanding ever more timely and granular data In this new environment there is increasing interest in alternative sources of data that might allow the economic statistics agencies to better address users demands for information Recent years have seen a proliferation of natively digital data that have enormous potential for improving economic statistics These include item level transactional data on price and quantity from retail scanners or companies internal systems credit card records bank account records payroll records and insurance records compiled for private business purposes data automatically recorded by sensors or mobile devices and a growing variety of data that can be obtained from websites and social media platforms Staggering volumes of digital information relevant to measuring and understanding the economy are generated each second by an increasing array of devices that monitor transactions and business processes as well as track the activities of workers and consumers Incorporating these non designed Big Data sources into the economic measurement infrastructure holds the promise of allowing the statistical agencies to produce more accurate more timely and more disaggregated statistics with lower burden for data providers and perhaps even at lower cost for the statistical agencies The agencies already have begun to make use of novel data to augment traditional data sources Modern data science methods for using Big Data have advanced sufficiently to make the more systematic incorporation of these data into official statistics

feasible Indeed the availability of new sources of data offers the opportunity to redesign the underlying architecture of official statistics Considering the threats to the current measurement model arising from falling survey response rates increased survey costs and the growing difficulties of keeping pace with a rapidly changing economy fundamental changes in the architecture of the statistical system will be necessary to maintain the quality and utility of official statistics This volume presents cutting edge research on the deployment of big data to solve both existing and novel challenges in economic measurement The papers in this volume show that it is practical to incorporate big data into the production of economic statistics in real time and at scale They report on the application of machine learning methods to extract usable new information from large volumes of data They also lay out the challenges both technical and operational to using Big Data effectively in the production of economic statistics and suggest means of overcoming those challenges Despite these challenges and the significant agenda for research and development they imply the papers in the volume point strongly toward more systematic and comprehensive incorporation of Big Data to improve official economic statistics in the coming years
