interviews she illustrates how NATO the world's foremost alliance has even embedded these ideas in the planning and execution of its missions For troops deployed on NATO missions this often means seeking out women in their operating area to improve intelligence gathering activities While this helps the mission does it help women and conflict affected communities Because of the military's focus on operational effectiveness above all else von Hlatky argues that there is a distortion of WPS norms as gender equality concerns fade into the background Looking at NATO's ongoing operations in Iraq Kosovo and the Baltics Deploying Feminism details the process by which Women Peace and Security norms are militarized and put at the service of operational effectiveness Further it shows why an adjustment is necessary for gender equality to become a true planning priority

**Making Cities Global** A. K. Sandoval-Strausz, Nancy H. Kwak, 2017-09-12 In recent decades hundreds of millions of people across the world have moved from rural areas to metropolitan regions some of them crossing national borders on the way While urbanization and globalization are proceeding with an intensity that seems unprecedented these

are only the most recent iterations of long term transformations cities have for centuries served as vital points of contact between different peoples economies and cultures Making Cities Global explores the intertwined development of urbanization and globalization using a historical approach that demonstrates the many forms transnationalism has taken each shaped by the circumstances of a particular time and place It also emphasizes that globalization has not been persistent or automatic many people have been as likely to resist or reject outside connections as to establish or embrace them The essays in the collection revolve around three foundational themes The first is an emphasis on connections among the United States East and Southeast Asia Latin America and South Asia Second contributors ground their studies of globalization in the built environments and everyday interactions of the city because even world spanning practices must be understood as people experience them in their neighborhoods workplaces stores and streets Last is a fundamental concern with the role powerful empires and nation states play in the emergence of globalizing and urbanizing processes Making Cities Global argues that combining urban history with a transnational approach leads to a richer understanding of our increasingly interconnected world In order to achieve prosperity peace and sustainability in metropolitan areas in the present and into the future we must understand their historical origins and development Contributors Erica Allen Kim Leandro Benmergui Matt Garcia Richard Harris Carola Hein Nancy Kwak Carl Nightingale Amy C Offner Margaret O Mara Nikhil Rao A K Sandoval Strausz Arijit Sen Thomas J Sugrue
