Social Standards in EU and US Trade Agreements Evgeny Postnikov, 2020-04-02 This book examines the causes and consequences of social standards in US and EU preferential trade agreements PTAs PTAs are the new reality of the global trading system Pursued by both developed and developing countries they increasingly incorporate labor and environmental issues to prevent a race to the bottom in social regulation and counter protectionism Using principal agent theory to explore why US PTAs have stricter social standards than those signed by the EU Postnikov argues that the level of institutional insulation of trade policy executives from interest groups and legislators determines the design of social standards In the EU

where institutional insulation is high social standards mirror the normative preferences of the European Commission leading to a softer approach In the US where such insulation is low social standards are driven by interest groups and legislators they control resulting in a stricter approach This book shows that both approaches can be effective but work through different causal mechanisms To test his argument Postnikov draws on original data collected in Brussels Washington Santiago Bogota and Seoul This book will be of interest to all scholars and students working in the fields of international political economy and EU and US trade policy

**Islamic Finance and the New Financial System** Tariq Alrifai, 2015-03-23 Can Islamic finance save the global system Islamic Finance and the New Financial System describes how the adoption of Islamic finance principles in future regulatory decisions could help prevent future shocks in the global financial system Using illustrations and examples to highlight key points in recent history this book discusses the causes of financial crises why they are becoming more frequent and increasingly severe and how the new financial system will incorporate elements of Islamic finance whether deliberately or not With an introspective look at the system and an examination of the misconceptions and deficiencies in theory vs practice readers will learn why Islamic finance has not been as influential as it should be on the larger global system Solutions to these crises are thoroughly detailed and the author puts forth a compelling argument about what can be expected in the future Despite international intervention and global policy changes the financial system remains in a fragile state There is an argument to be made about integrating Islamic finance into the new system to facilitate stronger resilience and this book explains the nuts and bolts of the idea while providing the reader with a general understanding of Islamic

finance Understand the key principles of Islamic finance Examine the history of the current financial system Discover how Islamic finance can help build a new debt free economy Learn how Islamic finance theory doesn't always dictate practice Although Islamic finance is a growing market it is still a foreign concept to many Those within the Islamic finance circles wonder why the system has yet to gain broader appeal despite its ability to create a strong and well balanced economy Islamic Finance and the New Financial System provides clever analysis and historical background to put the issues into perspective **International Business** K. The WTO and Infant Industry Promotion in Developing Countries Juan He, 2014-09-25 The charter of the World Trade Organization WTO sets the tone that sustainable trade and economic development dominates multilateral trade negotiation and specific working agreements This book examines the novel challenge for developing countries to upgrade and optimize their industrial structure and trade composition by stimulating genuinely innovative and competitive industrial strength The book specifically explores the issue of infant industry promotion under the legal framework of the WTO treaties and case law Taking the regulatory measures and incentives China has used to build up a large civil aircraft supplier the book evaluates the key trade agreements relevant to infant industry promotional policies and practices such as product regulations and standards under the Agreement on Technical Barriers to Trade and export promotion policies under the Agreement on Subsidies and Countervailing Measures Juan He argues that the regulatory room prescribed by the multilateral trade rules of the WTO does not allow adequate space for developing countries to encourage new and technologically advanced areas of production and trade The author concludes by suggesting ways in which WTO rules could be modified to help enable developing countries industrialization In doing so the book highlights a need to investigate how localized and international policy trends can be reconciled and enhanced towards the common goal of development The book will be of great interest to scholars and students of international trade law Chinese studies international political economy and of great use to
