Understanding the current state of affairs and tools available in the study of international finance is increasingly important as few areas in finance can be divorced completely from international issues International Finance reflects the new diversity of interest in international finance by bringing together a set of chapters that summarizes and synthesizes developments to date in the many and varied areas that are now viewed as having international content The book attempts to differentiate between what is known what is believed and what is still being debated about international finance The survey nature of this book involves tradeoffs that inevitably had to be made in the process given the vast footprint that constitutes international finance No single book can cover everything This book however tries to maintain a balance between the micro and macro aspects of international finance Although each chapter is self contained the chapters form a logical whole that follows a logical sequence The book is organized into five broad categories of interest 1 exchange rates and risk management 2 international financial markets and institutions 3 international investing 4 international financial management and 5 special topics The chapters cover market integration financial crisis and the links between financial markets and development in some detail as they relate to these areas In each instance the contributors to this book discuss developments in the field to date and explain the importance of each area to finance as a field of study Consequently the strategic focus of the book is both broad and narrow depending on the reader's needs The entire book provides a broad picture of the current state of international finance but a reader with more focused interests will find individual chapters illuminating on specific topics *International Finance* Dilip Das, 2003-09-02 In this updated fourth edition author Maurice Levi successfully integrates both the micro and macro aspects of international finance He successfully explores managerial issues and focuses on problems arising from financial trading relations between nations whilst covering key topics such as organization of foreign exchange markets determination of exchange rates the fundamental principles of international finance foreign exchange risk and exposure fixed and flexible exchange rates This impressive new edition builds and improves upon the popular style and structure of the original With new data improved pedagogy and coverage of all of the main developments in international finance over the last few years this book will prove essential reading for students of economics and business

Lessambo,2015-09-15 Since the recent international crises the role and significance of international financial institutions IFI have been challenged Some have argued that global financial institutions are inadequate and inefficient in performing their missions and may be replaced by modern institutions with inclusive governance and a goal focused approach *International Financial Institutions and Their Challenges* analyzes the claimed purposes of IFIs and their failures and proposes solutions for the future This comprehensive account is the first book of its kind to give readers an exhaustive overview of key IFI s from the International Monetary Fund to the Islamic Development Bank By encouraging readers to think outside the box Lessambo enhances the current and future debates on IFIs The book brings readers to the real challenges of international finance and appeals to scholars in economics finance international studies government studies law and political science as well as professionals in finance development experts and employees at NGOs

Global Financial Crisis And Challenges For China Mu Yang,Michael Siam-heng Heng,2012-07-25 The book analyzes the nature of Chinese economy which enables it to go through the financial tsunami pretty unscathed It discusses the stimulus package designed by the Chinese government to keep the economy on course as well as its results both positive and negative aspects in the middle and long term The 2008 09 financial crisis makes it very clear that we need a two pronged approach to deal with the situation namely governments need a to take quick and decisive actions to stem any further deterioration in financial systems b to revamp their economies by refitting existing engines in the real economy China as the third largest economy in the world and with its robust domestic consumption and a healthy financial system is one of the most important drivers to pull the world out of recession According to the Chinese leadership China s main contribution is to keep its own economy running smoothly In response to the crisis the Beijing government has poured money into the following sectors public housing earthquake reconstruction physical infrastructure social security education and healthcare So far the results have helped China to maintain the targeted high growth Given the open nature of its economy its high growth has also benefited other countries thereby contributing to the global economy The current crisis

strengthens a trend that has emerged since the Asian financial crisis of 1997 And that is the enhanced economic integration of China with its East Asian neighbours and Southeast Asia This augurs well for East Asian regionalism which may include the birth of Asian Monetary Fund The global environment in the wake of the crisis poses new challenges to China for example in the form of shrinking size of its traditional export market in the USA and Europe China needs to modify its strategy from previous export oriented and investment driven strategy into one with more emphasis on consumption There is a lot of scope for China to embark on productive consumption such as cleaning up the environment physical infrastructure social security education and healthcare If done well they will lay a firm basis for long term economic development It represents an occasion for China to embark on a nation wide effort to upgrade its economy in the key sectors At the same time attention needs to be paid to improving economic legal institutional framework to support China s role as a major global player

Globalization and Sustainable Development in Africa Bessie House-Soremekun, Toyin Falola, 2011 The first comprehensive work on globalization within the context of sustainable development initiatives in Africa

Financial Institutions Management Anthony Saunders, 2000 Focuses on the risks faced by managers of financial institutions and the methods and markets through which these risks are managed Pertinent information regarding non bank financial institutions provides a more holistic view of the challenges raised by factors such as interest rates
