Running the Obstacle Course to Sexual and Reproductive Health Bonnie Shepard, 2006-05-30 These four multi disciplinary studies focus on sexual and reproductive health advocacy and programs in Latin America Based on original research and the author s 25 years of experience working in the region the text illuminates the political cultural and organizational dynamics that pose an obstacle course to sexual and reproductive health dynamics that veterans of the culture wars in many other regions of the world will recognize One groundbreaking study of advocacy in Colombia and Chile for the legalization of abortion and divorce discusses the double discourse system that keeps repressive laws in place and punishes public opposition to political norms that are based on religious doctrine Another study of Latin American NGO regional and national advocacy networks examines the roots of difficulties they experience in unified decision making often resulting in failure to take decisive political action The book then offers two program case studies one in Peru and one in Chile focusing on issues of citizen participation and respect for rights in health systems and in schools The Peruvian study brings to life a four city experiment to foster community participation of women s organizations in health services The Chilean study focuses on a highly participatory and successful sex education program in public schools and The ways in which political controversies affected the program eventually contributing to its demise The book s holistic approach written from the point

International Law and Weapons Review Natalia Jevglevskaja, 2021-12-16 International law requires that before any new weapon is developed purchased or modified the legality of its use must be determined This book offers the first comprehensive and systemic analysis of the law mandating such assessments Article 36 of the 1977 Additional Protocol I to the Geneva Conventions Underpinned by empirical research the book explores the challenges the weapons review authorities are facing when examining emerging military technology such as autonomous weapons systems and autonomous cyber capabilities It argues that Article 36 is sufficiently broad to cover a wide range of military systems and offers States the necessary flexibility to adopt a process that best suits their organisational demands While sending a clear signal that law should not simply follow technological developments but rather steer them the provision has its limits however which are shaped and defined by the interpretative decisions made by States

Oxford Textbook of Migrant Psychiatry Dinesh Bhugra, 2021-02-04 Migrant psychiatry is an evolving subdiscipline within cultural psychiatry that deals with the impact of migration on the mental health of those who have migrated and those who work with these groups and provide services to them Stress related to migration affects migrants and their extended families either directly or indirectly The process of migration is not just a phase but leads on to a series of adjustments including acculturation which may occur across generations Factors such as changes in diet attitudes and beliefs and overall adjustment are important in settling down and making the individuals feel secure This period of adjustment will depend upon the individual migrant's pre migration experiences migration process and post migration experiences but also upon an individual's personality social support and emotional response to migration Socio demographic factors such as age gender educational and economic status will all play a role in post migration adjustment In order to understand the impact on individuals not only the type of migration and different stressors but also the types of psychological mechanisms at a personal level and the resources and processes at a societal level need to be explored Despite the number of refugees and asylum seekers around the world

increasing at an astonishing rate the mental health needs of migrants are often ignored by policy makers and clinicians The Oxford Textbook of Migrant Psychiatry is designed to serve as the comprehensive reference resource on the mental health of migrants bringing together both theoretical and practical aspects of the mental health needs of refugees and asylum seekers for researchers and professionals Individual chapters summarise theoretical constructs related to theories of migration the impact of migration on mental health and adjustment collective trauma individual identity and diagnostic fallacies The book also covers the practical aspects of patient management including cultural factors ethnopsychopharmacology therapeutic interaction and therapeutic expectation and psychotherapy Finally the book will examine special clinical problems and special patient groups Part of the authoritative Oxford Textbooks in Psychiatry series this resource will serve as an essential reference for psychiatrists mental health professionals general practitioners primary care physicians social workers policy makers and voluntary agencies dealing with refugees and asylum seekers **After the Caliphate** Colin P.

Clarke,2019-05-29 In 2014 the declaration of the Islamic State caliphate was hailed as a major victory by the global jihadist movement But it was short lived Three years on the caliphate was destroyed leaving its surviving fighters many of whom were foreign recruits to retreat and scatter across the globe So what happens now Is this the beginning of the end of IS Or can it adapt and regroup after the physical fall of the caliphate In this timely analysis terrorism expert Colin P Clarke takes stock of IS its roots its evolution and its monumental setbacks to assess the road ahead The caliphate he argues was an anomaly The future of the global jihadist movement will look very much like its past with peripatetic and divided groups of militants dispersing to new battlefields from North Africa to Southeast Asia where they will join existing civil wars establish safe havens and sanctuaries and seek ways of conducting spectacular attacks in the West that inspire new followers In this fragmented and atomized form Clarke cautions IS could become even more dangerous and challenging for counterterrorism forces as its splinter groups threaten renewed and heightened violence across the globe **StarBriefs 2001** ,2012-12-06

This compilation probably looks like one of the craziest things a human being could spend his or her time on Yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a surprisingly long distance This is exactly the story behind this list which appeared first as a few pages within the directory StarGuides or whatever name it had at that time and as a distinct sister publication since 1990 The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling Perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields It is for this purpose that this dictionary might be most often used Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions **International Cataloguing and**
