Interpreting Environments Tradition Deconstruction Hermeneutics:

Interpreting Environments Robert Mugerauer, 2014-10-14 In this pioneering book Robert Mugerauer seeks to make deconstruction and hermeneutics accessible to people in the environmental disciplines including architecture planning urban studies environmental studies and cultural geography Mugerauer demonstrates each methodology through a case study The first study uses the traditional approach to recover the meaning of Jung's and Wittgenstein's houses by analyzing their historical intentional contexts The second case study utilizes deconstruction to explore Egyptian French neoclassical and postmodern attempts to use pyramids to constitute a sense of lasting presence And the third case study employs hermeneutics to reveal how the American understanding of the natural landscape has evolved from religious to secular to ecological since the nineteenth century

Interpreting Environments Robert Mugerauer, 1995 In this pioneering book Robert Mugerauer seeks to make deconstruction and hermeneutics understandable and useable for people in the environmental disciplines including architecture planning urban studies environmental studies and cultural geography He chooses case studies to demonstrate the use of each methodology without advocating any particular one so that their strategies assumptions implications strengths and weaknesses become clear The first case study demonstrates the traditional approach and aims to recover the meaning of Jung's and Wittgenstein's houses by analyzing their historical intentional contexts The second case study utilizes the deconstructivist approach to explore Egyptian French neoclassical and postmodern attempts to use pyramids to constitute a sense of lasting presence And the third case study employs hermeneutics to reveal how the American understanding of the natural landscape has evolved from religious to secular to ecological since the nineteenth century

Visual Theology of the Huguenots Randal Carter Working, 2017-02-23 The role of architecture within the French Reformed tradition has been of recent scholarly interest seen in the work of Helene Guicharnaud Catharine Randall Andrew Spicer and others Few however have investigated in depth the relationship between Reformed theology and architectural forms In *The Visual Theology of the Huguenots* Randal Carter Working explores the roots of Reformed aesthetics set against the background of late medieval church architecture Indicating how demonstrably important the work of Serlio is in the spreading of the ideas of Vitruvius Working explains the influence of classical Roman building on French Reformed architecture He follows this with an examination of five important Huguenot architects Philibert de l'Orme Bernard Palissy Jacques Androuet du Cerceau Salomon de Brosse and Jacques Perret The distinct language of Huguenot architecture is revealed by his comparative analysis of three churches St Pierre in Geneva a medieval church overhauled by the Reformers St Gervais St Protais a Parisian Catholic church whose facade was completed by the French Reformed architect Salomon de Brosse and the temple at Charenton a structure also designed and built by de Brosse These three buildings demonstrate how the contribution of Huguenot architecture gave expression to Reformed theological ideas and helped bring about the renewal of classicism in France

Interpreting Nature Brian Treanor, Martin

Drenthen, David Utsler, 2013-11-11 Modern environmentalism has come to realize that many of its key concerns wilderness and nature among them are contested territory viewed differently by different people Understanding nature requires science and ecology to be sure but it also requires a sensitivity to history culture and narrative Thus understanding nature is a fundamentally hermeneutic task

The End of Tradition? Nezar Alsayyad, 2004-08-02 Rooted in real world observations this book questions the concept of tradition whether contemporary globalization will prove its demise or whether there is a process of simultaneous ending and renewing In his introduction Nezar Alsayyad discusses the meaning of the word tradition and the current debates about the end of tradition Thereafter the book is divided into three parts The three chapters in part I explore the inextricable link between tradition and modern revealing the geopolitical implications of this link Part II looks at tradition as a process of invention and here the three chapters are all concerned with the making of landscapes and landscape myths showing how the spectacle of history can be aestheticized and naturalized Finally Part III shows how tradition is a regime programmed and policed and how it has been deployed resisted and reworked through hegemonic struggles that seek to create both built environments and citizen subjects

The Oxford Handbook of Environmental Ethics Stephen Mark Gardiner, Allen Thompson, 2017 We live during a crucial period of human history on Earth Anthropogenic environmental changes are occurring on global scales at unprecedented rates Despite a long history of environmental intervention never before has the collective impact of human behaviors threatened all of the major bio systems on the planet Decisions we make today will have significant consequences for the basic conditions of all life into the indefinite future What should we do How should we behave In what ways ought we organize and respond The future of the world as we know it depends on our actions today A cutting edge introduction to environmental ethics in a time of dramatic global environmental change this collection contains forty five newly commissioned articles with contributions from well established experts and emerging voices in the field Chapters are arranged in topical sections social contexts history science economics law and the Anthropocene who or what is of value humanity conscious animals living individuals and wild nature the nature of value truth and goodness practical reasons hermeneutics phenomenology and aesthetics how things ought to matter consequences duty and obligation character traits caring for others and the sacred essential concepts responsibility justice gender rights ecological space risk and precaution citizenship future generations and sustainability key issues pollution population energy food water mass extinction technology and ecosystem management climate change mitigation adaptation diplomacy and geoengineering and social change conflict pragmatism sacrifice and action Each chapter explains the role played by central theories ideas issues and concepts in contemporary environmental ethics and their relevance for the challenges of the future

The Routledge Companion to Hermeneutics Jeff Malpas, Hans-Helmuth Gander, 2014-11-20 Hermeneutics is a major theoretical and practical form of intellectual enquiry central not only to philosophy but many other disciplines in the humanities and social sciences With phenomenology and existentialism it is also one of the twentieth

century's most important philosophical movements and includes major thinkers such as Heidegger, Gadamer and Ricoeur. The Routledge Companion to Hermeneutics is an outstanding guide and reference source to the key philosophers, topics and themes in this exciting subject and is the first volume of its kind. Comprising over fifty chapters by a team of international contributors, the Companion is divided into five parts: main figures in the hermeneutical tradition; movement including Heidegger, Gadamer and Ricoeur; main topics in hermeneutics such as language, truth, relativism and history; the engagement of hermeneutics with central disciplines such as literature, religion, race and gender; and art, hermeneutics and world philosophies including Asian, Islamic and Judaic thought. Hermeneutic challenges and debates such as critical theory, structuralism and phenomenology.

Radical Ecopsychology, Second Edition Andy Fisher, 2013-01-01. Expanded new edition of a classic examination of the psychological roots of our ecological crisis.

Architecture, Culture, and Spirituality Thomas Barrie, Julio Bermudez, Phillip James Tabb, 2016-03-09. Architecture has long been understood as a cultural discipline able to articulate the human condition and lift the human spirit, yet the spirituality of architecture is rarely directly addressed in academic scholarship. The seventeen chapters provide a diverse range of perspectives grouped according to topical themes: Being in the World; Sacred, Secular and the Contemporary Condition; Symbolic Engagements; Sacred Landscapes and Spirituality and the Designed Environment. Even though the authors approach the subject from a range of disciplines and theoretical positions, all share interests in the need to rediscover, redefine or reclaim the sacred in everyday experience, scholarly analysis and design.

Where Land Meets Sea Anna Ryan, 2016-02-11. Drawing together philosophical, empirical and academic thinking, this book focuses on generating awareness of the relationship forged between self and surroundings. It details research undertaken at two coastal sites: the South Wall in Dublin city and the Maharees peninsula in Co. Kerry, Ireland. Sixty-two participants were engaged in photography and drawing to enable this exploration of spatial experience. The participants' photographs and drawings present how spatial sensibilities can be revealed by becoming more attentive to the immediacy of bodily knowledge, our more than cognitive experience. Their communications resonate with the philosophers and theorists considered, including Merleau-Ponty, Edward Casey, Gilles Deleuze, Dalibor Vesely and contemporary cultural geographers. From exploring the experienced spatiality of the meeting of land and sea, this book begins to suggest an alternative politics of the coast.

Flood Risk and Social Justice Zoran Vojinovic, Michael B. Abbott, 2012-03-05. Flood Risk and Social Justice is a response to the rising significance of floods and flood-related disasters worldwide as an initiative to promote a socially just approach to the problems of flood risk. It integrates the human, social and the technological components to provide a holistic view. This book treats flooding as a multi-dimensional human and natural world tragedy that must be accommodated using all the social and technological means that can be mobilised before, during and after the flooding event. It covers socially just flood risk mitigation practices which necessitate a wide range of multidisciplinary approaches starting from social and wider environmental needs, including feedback cycles between human needs and

technological means Flood Risk and Social Justice looks at how to judge whether a risk is acceptable or not by addressing an understanding of social and phenomenological considerations rather than simple calculations of probabilities multiplied by unwanted outcomes and their balancing between costs and benefits It is argued that the present flood management practice should be largely replaced by the social justice approach where particular attention is given to deciding what is the right thing to do within a much wider context Thus it insists upon the validity of modes of human understanding which cannot be addressed within the limited context of modern science Flood Risk and Social Justice is written to support a wide range of audiences and seeks to improve the dialogue between researchers and practitioners from different disciplines including post graduate engineering environmental and social science students industry practitioners academics planners environmental advocacy groups and environmental law professionals who have a strong interest in a new kind of social justice work that can act as a continuous counter balance to the various mechanisms that unceasingly give rise to profound injustices More information about this book can be found in this article written for the WaterWiki by the author <http://www.iwawaterwiki.org/xwiki/bin/view/Articles/FloodRiskandSocialJustice> Authors Zoran Vojinovic is Associate Professor at the UNESCO IHE Institute for Water Education Delft the Netherlands with almost 20 years of consulting and research experience in various aspects of water industry in New Zealand Australia Asia Europe Central South America and the Caribbean Michael B Abbott is Emeritus Professor at the UNESCO IHE Institute for Water Education Delft the Netherlands and a Director of the European Institute for Industrial Leadership in Brussels He founded and developed the disciplines of Computational Hydraulics and Hydroinformatics and co founded the Journal of Hydroinformatics with Professor Roger Falconer

The Architect as Magician Albert C. Smith, Kendra Schank Smith, 2020-05-07 The Architect as Magician explores the connection between magic and architecture There is a belief that a greater understanding of the meaning of magic provides insights about architecture and architects design processes Architects influence the effects of nature through the making of their buildings In an analogous condition magicians perform rituals in an attempt to influence the forces of nature This book argues that architects could gain much by incorporating ideas from magic into their design process The book demonstrates through historical and current examples the important influence magic has had on the practice of architecture The authors explain how magic helps us to understand the way we infuse architecture with meaning and how magic affects and inspires architectural creation Aimed at architects students scholars and researchers The Architect as Magician helps readers discover the ambiguous and spiritual elements in their design process

[The Sacred In-Between: The Mediating Roles of Architecture](#) Thomas Barrie, 2013-09-13 The sacred place was and still is an intermediate zone created in the belief that it has the ability to co join the religious aspirants to their gods An essential means of understanding this sacred architecture is through the recognition of its role as an in between place Establishing the contexts approaches and understandings of architecture through the lens of the mediating roles often performed by sacred architecture this book offers the reader an

extraordinary insight into the forces behind these extraordinary buildings Written by a well known expert in the field the book draws on a unique range of cases reflecting on these inspiring places their continuing ontological significance and the lessons they can offer today Fascinating reading for anyone interested in sacred architecture *House and Home* Thomas Barrie, 2017-03-16 House and home are words routinely used to describe where and how one lives This book challenges predominant definitions and argues that domesticity fundamentally satisfies the human need to create and inhabit a defined place in the world Consequently house and home have performed numerous cultural and ontological roles and have been assiduously represented in scripture literature art and philosophy This book presents how the search for home in an unpredictable world led people to create myths about the origins of architecture houses for their gods and house tombs for eternal life Turning to more recent topics it discusses how writers often used simple huts as a means to address the essentials of existence modernist architects envisioned the capacity of house and home to improve society and the suburban house was positioned as a superior setting for culture and family Throughout the book house and home are critically examined to illustrate the perennial role and capacity of architecture to articulate the human condition position it more meaningfully in the world and assist in our collective homecoming **Drawn to Design** Eric Jenkins, 2022-04-19 The book is a guide for students and teachers to understand the need for the role of and the methods and techniques of freehand analytical sketching in architecture The presentation focuses on drawing as an approach to and phase of architectural design The conceptual goal of this approach is to use drawing not as illustration or depiction but as exploration The first part of the book discusses underlying concepts of freehand sketching in design education and practice as a complement to digital technologies The main component is a series of chapters that constitute a typology of fundamental issues in architecture and urban design for instance issues of facade are illustrated with sketch diagrams that show how facades can be explored and sketched through a series of specific questions and step by step procedures In the expanded and updated edition a new part explores the questions and experiences of large architectural offices in applying freehand drawing in the practice of architectural design This book is especially timely in an age in which the false conflict between traditional vs digital gives way to multiple design tools including sketching It fosters understanding of the essential human ability to investigate the designed and the natural world through freehand drawing *Marie Antoinette at Petit Trianon* Denise Maier-Barron, 2018-07-11 Marie Antoinette at Petit Trianon challenges common perceptions of the last Queen of France appraising the role she played in relation to the events of French Revolution through an original analysis of contemporary heritage practices and visitor perceptions at her former home the Petit Trianon Controversy and martyrdom have placed Marie Antoinette's image within a spectrum of cultural caricatures that range from taboo to iconic With a foundation in critical heritage studies this book examines the diverse range of contemporary images portraying Marie Antoinette's historical character showing how they affect the interpretation and perception of the Petit Trianon By considering both

producers and receivers of these cultural heritage exponents Marie Antoinette's historical figure and the historic house museum of the Petit Trianon the book expands current understandings of twenty first century cultural heritage perceptions in relation to tourism and popular culture A useful case study for academics researchers and postgraduate students of cultural heritage it will also be of interest to historians keepers of house museums and those working in the field of tourism studies

Material Culture in America Helen Sheumaker, Shirley Wajda, 2007-11-07 The first encyclopedia to look at the study of material culture objects images spaces technology production and consumption and what it reveals about historical and contemporary life in the United States Reaching back 400 years Material Life in America An Encyclopedia is the first reference showing what the study of material culture reveals about American society revelations not accessible through traditional sources and methods In nearly 200 entries the encyclopedia traces the history of artifacts concepts and ideas industries peoples and cultures cultural productions historical forces periods and styles religious and secular rituals and traditions and much more Everyone from researchers and curators to students and general readers will find example after example of how the objects and environments created or altered by humans reveal as much about American life as diaries documents and texts

The Future of the Southern Plains Sherry Lynn Smith, 2003 Seven historians one geographer and a paleoclimatologist contribute a wealth of observation analysis and commentary on the environmental characteristics and history of the Southern Plains They address such themes as failing communities scarce water endangered species and disappearing ways of life and the possible results of these developments not only in the Southern Plains but elsewhere on the globe

BOOK JACKET **Power, Identity, and the Rise of Modern Architecture** Koompong Noobanjong, 2003 This dissertation examines the evolution of Western and Modern architecture in Siam and Thailand It illustrates how various architectural ideas have contributed to the physical design and spatial configuration of places associated with negotiation and allocation of political power which are throne halls parliaments and government and civic structures since the 1850s

Martin Heidegger Timothy Clark, 2011-03-25 Since the publication of his mammoth work Being and Time Martin Heidegger has remained one of the most influential figures in contemporary thought and is a key influence for modern literary and cultural theory This guidebook provides an ideal entry point for readers new to Heidegger outlining such issues and concepts as the limits of theory the history of being the origin of the work of art language the literary work poetry and the political Heidegger's involvement with Nazism Fully updated throughout and featuring a new section on environmental thought and ecocriticism this guidebook clearly and concisely introduces Heidegger's crucial work relating to art language and poetry and outlines his continuing influence on critical theory
