Biology is mostly associated with memory at this level, which is true to a certain extent. However, there are methods that make things more logical and better equip you for application questions, as you get to understand the concept, not just know it. While the length of these notes may seem daunting, they are structured in a way that will help you to draw connections between topics and ideas. To help, I have put key words in bold and added some questions that may not be comprehensively covered by the syllabus. Finally, I've also added in some accelerated stuff in in red so you can read a little if you want to flex 😊 Study hard, study smart and God bless!
