Defending Hope Justin Langford,2013-02-01 Most of the current scholarly literature on biblical intertextuality or the use of the Old Testament in the New Testament exhibits a high degree of variance regarding methodological approach The variety of methods employed naturally yields a variety of results Semiotics or the study of signs and how they communicate offers an avenue for approaching intertextual references that focuses on communication theory and meaning In addition semiotic theory provides an overarching methodological framework for examining intertextual references As such a semiotic approach can assist in creating greater methodological consistency and clarity for this nuanced area of New Testament study The purpose of this book is to explore the use of semiotics as a viable approach to biblical intertextuality The intertextual references to Isaiah in 1 Peter will serve as the test case for an application of the method A semiotic approach is promising because it offers a solution to the pervasive problem of methodology in intertextual studies Moreover the investigation of 1 Peter s use of Isaiah provides a fresh perspective on how Peter utilizes this important source in the construction of his epistle and the communication of his message

on his original theory of the initial cultural unity that embraces language technology and religion African Traditional Religion comes into focus as a valid alternative and in the long run an equal partner to Christianity in the creation of a modern pluralistic society While the author's concepts and conclusions may seem controversial to some none of the readers can discard them as irrelevant Africa's future will in many respects depend on her ability to preserve her cultural heritage in which religion plays a crucial part

Introducing Barthes Philip Thody, 2015-03-14 INTRODUCING guide to the cult author semiologist and analyzer of advertising Roland Barthes Roland Barthes is best known as a semiologist a student of the science of signs This sees human beings primarily as communicating animals and looks at the way they use language clothes gestures hair styles visual images shapes and colour to convey to one another their tastes their emotions their ideal self image and the values of their society Introducing Barthes brilliantly elucidates Barthes application of these ideas to literature popular culture clothes and fashion and explains why his thinking in this area made him a key figure in the structuralist movement of the 1960s It goes on to describe how his later insistence on pleasure the delights of sexual non conformity and the freedom of the reader to interpret literary texts in the light of ideologies such as existentialism Marxism and Freudianism as well as structuralism itself continues to make him one of the most dynamic and challenging of modern writers This is the perfect companion volume to Introducing Semiotics

Mapping European Empire Russell Foster, 2015-06-26 Empire and maps are mutually reliant phenomena and traceable to the dawn of civilisation Furthermore maps retain a supremely authoritative status as unquestioned reflections of reality In today's image saturated world their influence is more powerful now than at any other time in history This book argues that in the 21st century we are seeing an imperial renaissance in the European Union EU a political organisation which defies categorisation but whose power and influence grows by the year It examines the past present and future of the EU to demonstrate that empire is not a category of state but rather a collective imagination which reshapes history and appropriates an artificial past to validate the policies of the present and the ambitions of the future In doing so this book illuminates the imperial discourse that permeates the mass maps of the modern EU This text will be of key interest to students and scholars of political science EU Studies Human Geography European
