Introduction to Diffusion Tensor Imaging Susumu Mori,J-Donald Tournier,2013-08-02 The concepts behind diffusion tensor imaging DTI are commonly difficult to grasp even for magnetic resonance physicists To make matters worse a many more complex higher order methods have been proposed over the last few years to overcome the now well known deficiencies of DTI In Introduction to Diffusion Tensor Imaging And Higher Order Models these concepts are explained through extensive use of illustrations rather than equations to help readers gain a more intuitive understanding of the inner workings of these techniques Emphasis is placed on the interpretation of DTI images and tractography results the design of experiments and the types of application studies that can be undertaken Diffusion MRI is a very active field of research and theories and techniques are constantly evolving To make sense of this constantly shifting landscape there is a need for a textbook that explains the concepts behind how these techniques work in a way that is easy and intuitive to understand Introduction to Diffusion Tensor Imaging fills this gap Extensive use of illustrations to explain the concepts of diffusion tensor imaging and related methods Easy to understand even without a background in physics Includes sections on image

interpretation experimental design and applications Up to date information on more recent higher order models which are increasingly being used for clinical applications

The fact that these assumptions were correct was proven by the growth of the event While the first conference consisted of 41 presentations the conference reached 150 participants in Nałeczów in 2001 In this way the PPAM conference has become one of the premiere Polish conferences and definitely the most important one in the area of parallel distributed computing and applied mathematics This year's meeting gathered almost 200 participants from 32 countries A strict refereeing process resulted in the acceptance of approximately 150 contributed presentations while the rejection rate was approximately 33%
