The Constitutional Dimension of Contract Law Luca Siliquini-Cinelli, Andrew Hutchison, 2017-04-06

One of the hallmarks of the present era is the discourse surrounding Human Rights and the need for the law to recognise them Various national and supranational human rights instruments have been developed and implemented in order to transition society away from atrocity and callousness toward a more just and inclusive future In some countries this is done by means of an overarching constitution while in others international conventions or ordinary legislation hold sway Contract law plays a pivotal role in this context According to many this is done through the much debated civilising mission of the contract a notion which itself constitutes the canon of the Western liberal principle of civilised economy The movement away from the belief in the absolute freedom of contract which reached its zenith in the nineteenth century to the principles of fairness and justice that underpin contract law today is often deemed to be a testament to this civilising influence Delving into the interplay between human rights policies constitutional law and contract law from both theoretical and practical perspectives this first volume of a two book collection offers a totally new reappraisal of the subject by gathering a collection of essays written by contract law scholars from Europe South Africa Canada and Australia Instead of providing the reader with a sterile compilation of positivistic norms and policies on the impact of fundamental rights and constitutional law issues on contract law s development the authors build on their personal experience to analyse specific topics related to contracting that include a constitutional dimension The book fills an important void in comparative law scholarship and in so doing represents the starting point for further debate on the subject

French Civil Liability in Comparative Perspective

Jean-Sébastien Borghetti, Simon Whittaker, 2019-12-26 The French law of torts or of extra contractual liability is widely seen as exceptional For long it was based on a mere five articles of the Civil Code of 1804 but on this foundation the courts and legal scholars have constructed liabilities for fault and strict liability of an extraordinary breadth and significance While the rest of the general law of obligations including contract in the Civil Code was reformed in 2016 by executive ordonnance this area was left aside being the subject in 2017 of a proposal by the French Government for the legislative reform of the law of

civil liability a new legislative category to include both contractual and extra contractual liability This work considers important aspects of this developing area of French law in a series of essays by French lawyers and comparative lawyers working in French law and other civil law systems In doing so it provides insight into the doctrinal thinking and judgments of French lawyers as well as the possible directions in which this area of the law may be developed in the future

Bohaczewski,2020-04-09 When a mark acquires a reputation it becomes a means of attracting consumers by communicating to them various messages going beyond the indication of commercial origin of goods or services Thus trade marks familiar to the general public enjoy a special legal protection regime above and beyond that afforded trade marks in general allowing them to benefit from enhanced protection against reproduction or imitation detrimental to or taking unfair advantage of the distinctive character of the mark or its repute This richly researched book the first comprehensive guide to current European Union EU law and practice concerned with reputed trade marks conducts an in depth analysis of this extended protection provided by Regulation 2017 1001 on EU trade marks and Directive 2015 2436 under which it is mandatory across all Member States Using a practical approach focused on identifying and analysing the criteria for infringement of trade marks with a reputation in proceedings before civil courts and in administrative proceedings before the European Union Intellectual Property Office EUIPO or national trade mark offices the author addresses such elements of the special protection regime as the following prerequisites for infringement of the right to a reputed mark common to all recognised forms of infringement how to demonstrate each type of infringement of the right to the trade mark with a reputation blurring tarnishment and unfair advantage proof of reputation distinguishing the concept of well known trade mark legitimate versus questionable justifications of the due cause exception within the meaning of EU law provisions use of a disputed sign falling under freedom of expression identifying the role of likelihood of confusion under the special regime and how to prove the existence of a link between the signs in dispute The author pays detailed attention to the case law of the Court of Justice and General Court of the EU as well as cases before the EUIPO and national courts He takes into account research from a number of Member States plus Switzerland thus widening prior work in the field from its predominant English language context With this book practitioners will confidently approach cases before courts the EUIPO and national EU trade mark offices involving enhanced protection of trade marks with a reputation In addition the book will help judges and trade mark offices examiners to interpret the EU provisions and assess claims regarding such reinforced protection For scholars and students of intellectual property law this book will prove a cornerstone volume in the field

publicized aspects as doping sponsoring and media and responsibility for injuries are legally measured This monograph fills a gap in the legal literature by giving academics practitioners sports organizations and policy makers access to sports law at this specific level Lawyers representing parties with interests in France will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative sports law

Patent Law Injunctions Rafał Sikorski, 2018-11-27 In numerous jurisdictions courts have realized that injunctive relief should not be available automatically in case of patent infringement Particularly in the wake of the US Supreme Court decision in eBay v MercExchange it has become clear that granting an injunction may in some cases enable
