

## Connecting the subwoofer to the subwoofer (non-fader) output of the center unit

When the center unit output is a single RCA jack, use an RCA cord that converts the output into the two RCA jacks as shown above. The subwoofer output will be halved if the conversion cord is not used.

Connect the subwoofer to the subwoofer output (non-fader output) or the RCA jacks for the front output of the center unit.

### Notes:

- Read the instruction manuals for the connected components such as the center unit as well as this instruction manual.
- Please purchase an RCA cord that is commercially available separately. Use the provided RCA cord (1) for connection between the subwoofer and the separately purchased RCA cord.
- When the center unit incorporates a DSP, connect the subwoofer to the subwoofer output (non-fader output) or to the RCA jacks for the front output. Do not connect to the RCA jacks for the rear output, as the low-frequency reproduction effect may be attenuated due to the DSP effect.
