Kenya Medical Intake:

East African Doctors John Iliffe, 1998-08-27 John Iliffe's 1998 book is a history of the African medical profession in Uganda, Kenya and Tanzania from the earliest training of modern medical staff in the 1870s to the present day. Based on extensive research and dealing exclusively with African doctors, it offers an understanding of professionalisation in the Third World. It describes the recruitment and education of doctors, their understanding and practice of modern medicine, the struggle for international recognition of their qualifications and efforts to develop East African medical systems after independence and their experiences during a period of political and economic difficulty. The book ends with an account of the significant work of East African doctors in the study and control of AIDS. This is a major contribution to the social history of Africa and to the social history of medicine more broadly.

Brutal treatments Russell T. Moul, 2025-05-13 *Brutal treatments* explores the role medical doctors played in the colonial counterinsurgency campaigns in British Kenya 1952-1960 and French Algeria 1954-1962 in the final years of empire. It not only examines how these medical professionals became embroiled in the conflict but also how they used their knowledge to further the interests of the state. The book makes a substantial and significant contribution to the history of medicine, the history of medical ethics and the history of colonialism.

The Labor Market for Health Workers in Africa Agnes Soucat, Richard Scheffler, Tedros Ghebreyesus, 2013-04-26 Sub-Saharan Africa has only 12 percent of the global population yet this region accounts for 50 percent of child deaths, more than 60 percent of maternal deaths, 85 percent of malaria cases and close to 67 percent of people living with HIV. Sub-Saharan Africa however has the lowest number of health workers in the world, significantly fewer than in South Asia which is at a comparable level of economic development. *The Labor Market for Health Workers in Africa* uses the analytical tools of labor markets to examine the human resource crisis in health from an economic perspective. Africa's labor markets are complex with resources coming from governments, donors, the private sector and households. Low numbers of health workers and poor understanding of labor market dynamics are major impediments to improving health service delivery. Yet some countries in the region have developed innovative solutions with new approaches to creating a robust health workforce that can respond to the continent's health challenges. As Africa grows economically, the invaluable lessons in this book can help build tomorrow's African health systems.
