Tropentag 2015 Eric Tielkes, 2015-09-01 Large quantities of water are appropriated to produce the feed annually consumed in global livestock production. Rising concerns about increasing competition for water resources and projected increase in demand for livestock products make it imperative to look for strategies to sustainably increase livestock production with water being one key natural resource to consider. Using a combination of different datasets a mechanistic livestock model and a dynamic vegetation model we estimate the annual consumptive water use CWU in the global livestock sector associated with crops and fodder cultivated on cropland and grazed biomass from pastures. *Best in New African Poets 2015 Anthology* Mwanaka, Tendai R., da Purificacao, Daniel, 2015-12-01 Consisting of 214 poems and 79 poets from over 23 African countries and the Diasporas. *Best New African Poets 2015 Anthology* Poetry Progeria contains poems that deal with a panoply of issues feelings thoughts ideas beliefs on identity Africanness Blackness Whiteness Arabic Asian culture heritage place politics mis governance corruption exile loss memory spirituality sex gender love the individual and many others. It travels from Cape to Cairo Monrovia to Nairobi rooms in the beautiful Moroccan Sahara desert pastoral idyllic Savannas the rainy equatorial rainforests and then flies into the Diasporas as each poet speaks his her own story of the Africa that she he knows dreams and envisions with protective pride and resolute dedication. **Engineering Design and Mathematical Modelling** Nnamdi Nwulu, Mammo Muchie, 2020-12-17 Engineering Design and Mathematical Modelling Concepts and Applications consists of chapters that span the Engineering design and mathematical modelling domains. Engineering design and mathematical modelling are key tools techniques in the Science Technology and Innovation spheres. Whilst engineering design is concerned with the creation of functional innovative products and processes mathematical modelling seeks to utilize mathematical principles and concepts to describe and control real world phenomena. Both of these can be useful tools for spurring and hastening progress in developing countries. They are also areas where Africa needs to skill up in order to build a technological base. The chapters in this book cover the relevant research trends in the fields of both engineering design and mathematical modelling. This book was originally published as a special issue of the African Journal of Science Technology Innovation and Development. **China's Footprint in East Africa** Bob Wekesa, 2023-09-20 Based on an extensive literature review in depth interviews fieldwork and anecdotal evidence this text examines China's engagement with East Africa notably Rwanda Burundi Kenya Tanzania and Uganda and considers these relationships through the lens of history diplomacy education trade media cultural exchanges and infrastructure. It probes the sentiments of pessimism optimism and pragmatism to explore perceptions about China in East Africa. Africa China's ancient connection to the East African coast as well as other incidents of contact in the past are analyzed from the viewpoint of the deployment of Chinese soft power capital in current times. The book notably examines the significant role China is playing in the construction of new infrastructure and housing throughout East Africa and addresses China's involvement in the natural

resources sector and the political debate surrounding the construction of gas and oil pipelines its investment in the tourism sector in the news media and information and communication technology sectors as well as in educational and cultural programs
