Basic Mandarin Chinese - Speaking & Listening Textbook Cornelius C. Kubler, 2017-11-17 ING_08 Review quote *The Chinese Language* John DeFrancis, 1986-03-01 DeFrancis's book is first rate. It entertains. It teaches. It demystifies. It counteracts popular ignorance as well as sophisticated cocktail party ignorance. Who could ask for anything more? There is no other book like it. It is one of a kind, a first, and I would not only buy it but I would recommend it to friends and colleagues, many of whom are visiting China now and are adding two weeks of expert ignorance to the two kinds that existed before. This is a book for everyone. Joshua A. Fishman, research professor of social sciences, Yeshiva University, New York. Professor DeFrancis has produced a work of great effectiveness that should appeal to a wide-ranging audience. It is at once instructive and entertaining. While being delighted by the flair of his novel approach, the reader will also be led to ponder on some of the most fundamental problems concerning the relations between written languages and spoken languages. Specifically, he will be served a variety of information on the languages of East Asia, not as dry, pedantic facts but as appealing tidbits that whet the intellectual appetite. The expert will find much to reflect on in this book for Professor DeFrancis takes nothing for granted. William S. Y. Wang, professor of linguistics, University of California at Berkeley. **Learning Chinese in Diasporic**

Communities Xiao Lan, Curdt-Christiansen, Andy Hancock, 2014-07-15 This book brings together new theoretical perspectives and bilingual education models from different sociopolitical and cultural contexts across the globe in order to address the importance of sociocultural educational and linguistic environments that create, enhance or limit the ways in which diasporic children and young people acquire the Chinese language. The chapters present a variety of research-based studies on Chinese heritage language education and bilingual education, drawing on detailed investigations of formal and informal educational input, including language socialization in families, community heritage language schools and government-sponsored educational institutions. Exploring the many pathways of learning Chinese and being Chinese, this volume also examines the complex nature of language acquisition and development involving language attitudes and ideologies as well as linguistic practices and identity formation. *Learning Chinese in Diasporic Communities* is intended for researchers, teacher educators, students and practitioners in the fields of Chinese language education and bilingual education and more broadly those concerned with language policy studies and sociolinguistics. *Beyond the language classroom: researching MOOCs and other innovations* Kan Qian, Stephen Bax, 2017-06-28 With the rise of the internet and new communication technologies, language learning has moved beyond the classroom walls. This volume presents a range of important studies on innovative ways for learning languages outside the classroom. Chapters discuss MOOCs in the UK, Belgium, China and Italy for studying a range of languages, research on new apps, flipped classroom modes and approaches to informal learning in a range of international settings. In these ways, the volume offers a significant contribution to our understanding of how learning beyond the language classroom will transform language education in the decades to come. **Learn to Speak French for**
