The Integrator Scott Coplan, 2022-03-24 When a 145 million IT project failure pushes Los Angeles to the edge of financial meltdown the County CEO asks Max McLellan a harried IT project manager aka The Integrator for help The County Board gives Max 30 days to identify the problem and find a solution At first Max finds the usual missteps but something bigger and darker beckons an explosive source of project failure He must do something different rattling ghosts of previous County IT failures uncloaking crookedness and exposing truths that shatter careers With some people rooting for his failure Max battles to fit all the pieces together with the County team applying his proven framework to define the problem plan a solution and execute it successfully It s common knowledge that barely 50% of IT projects succeed per a 2017 Project Management Institute report Equally well known approximately 70% of large scale change management initiatives fail according to a 2017 McKinsey Co report Given the challenge to overcome these low success rates The Integrator offers a proven narrative on the organizational change framework for achieving Agile IT project management success based on the author s 45 year client experiences and published research The Integrator defines change management as the single overarching methodology integrating Agile IT and project management It does this because all projects are about change significant organizational and personal change The people involved their participation in and understanding and support of these changes ultimately determine IT projects success or failure In fact while all IT projects are about change successful projects change human behavior The methodologies included in the framework described in The Integrator include Change management as defined by AIM Accelerating Implementation Methodology Project management as defined by the Project Management Institute PMI Guide to the Project Management Body of Knowledge PMBOK Guide standard IT management as derived from the Institute of Electrical Engineers IEEE Guide

to the Software Engineering Body of Knowledge SWEBOK standard Agile as defined by the Agile Alliance's Agile Manifesto Written by a certified Project Management Professional and accredited change management practitioner The Integrator chronicles the challenges involved in applying this framework in a real world setting to achieve successful project implementation **The Digital Journey of Banking and Insurance, Volume I** Volker Liermann, Claus

Stegmann, 2021-10-30 This book one of three volumes showcases the effective transformation of companies providing banking and insurance services This first volume gives a business oriented introduction to the setting and the current challenges of fintech regtech and insurtech and provides an outlook on what will be needed in the future Specific sub departments in financial services are examined with a view to accounting risk and regulatory segments The book also addresses the importance of cultural aspects of the coming digital transformation with an eye to requirements that will enable a digital bank or insurance company to thrive in 2025 The angle shifts over the volumes from a business driven approach in Disruption and DNA to a strong technical focus in Data Storage Processing and Analysis leaving Digitalization and Machine Learning Applications with the business and technical aspects in between **Designing for Sustainability**
