Huppertz,2025-04-03 Covering 2001 to today *Designing Retail Experience in the 21st Century* presents readers with a critical cross disciplinary perspective on retail design bringing together scholarship from design architecture branding cultural studies and social studies Our retail experience has changed profoundly over the past two decades largely due to the impact of digital technologies While the rise of smartphones and online commerce threatened to displace bricks and mortar stores physical shopping has survived and in some cases thrived Today the most successful brands design experiences that engage customers both within the physical store and in the digital realm In this book D J Huppertz analyses how corporations design these experiences how we interact with them and how they align with broader social cultural and economic changes Eight case studies reveal how some of the largest global retail chains including Apple Amazon Nike Zara IKEA and LEGO and smaller chains such as Aesop and Gentle Monster utilize design to create engaging experiences Unlike in the past such corporations consider design in a continuum that extends from architecture and interiors to product and service design and from website and digital interactions to social media At the intersection of design and cultural studies this book provides a critical survey and understanding of design and retail experience in the 21st

century
