Learning with Legos Multiplication Common Core Standards

3.OA.1 – Interpret products of whole numbers e.g., interpret 5×7 as the total number of objects in 5 groups of 7 objects. For context, describe a context in which a total number of objects can be expressed as 5×7 .

3.OA.5 – Apply properties of operations as strategies to multiply and divide. **Examples:** Use mental strategies to compute 8×5 by knowing $5 \times 5 = 25$ and $3 \times 5 = 15$, then $8 \times 5 = 25 + 15 = 40$ or by $5 \times 10 = 50$, then $8 \times 5 = 50 - 10 = 40$. **Associative Property of Multiplication:** Knowing that $8 \times 5 = 40$ and $8 \times 2 = 16$, then $8 \times 7 = (8 \times 5) + (8 \times 2) = (8 \times 5) + (8 \times 2) = 40 + 16 = 56$ (Distributive Property of Multiplication).

3.OA.7 – Fluently multiply and divide within 100, using strategies such as the relationship between multiplication and division (e.g., knowing that $8 \times 5 = 40$, one knows that $40 \div 5 = 8$) or of properties of operations. By the end of Grade 3, know from memory all products of two one-digit numbers.

Activity 4: Independent practice. Students will use the Lego picture arrays on their activity sheet to do this activity, but they also use the actual Lego pieces if needed. Students will look at the picture array. They will label each side and put a multiplication sign in the top left corner. Then, they will write repeated addition sentence and a multiplication sentence for each Lego picture array. On their activity sheet, they are reminded that the number of rows (down) is the first factor written and the number in each row (across) is the second factor. The worksheet pages for this activity can be laminated for repeated use, or printed double-sided for use at a math station.

Common Core Math 3.OA.7 only requires students to know all one-digit numbers fluently. But by practicing them through 12, they are building understanding for the distributive property.
