Change* Jill Adler,Anna Sfard,2016-06-17 Research for Educational Change presents ways in which educational research can
fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues
that while research generated insights can have beneficial effects on learning and teaching the question of how these effects
are to be generated and sustained is far from evident The question of how to turn research into educational improvement is
discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book
four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African
mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so
that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms
Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights
to those responsible for educational practice the book deals with the perennial question of communication between those who
study educational processes and those who are directly responsible for teacher education educational research and
classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly
in the areas of mathematics education education research teacher education and classroom practice It will also appeal to
teacher educators practitioners and undergraduate students interested in educational research **On My Own** Xueli

Building Equitable STEM Transfer Pathways is the first book of its kind to provide a detailed on the ground examination of
the difficult paths curricular interpersonal and institutional that students must chart through community college The book
follows 1 670 two year college students over four years as they begin STEM programs in the Midwest and documents their
educational and life experiences as they moved toward or away from the prospect of transfer to a four year institution Their
stories reveal that they were on their own left to navigate the pathways to transfer without meaningful institutional support
The students pursued one of four pathways or momentum trajectories linear upward detoured deferred or taking a break The
preexisting and lasting disparities in their access to education and financial resources their experiences with teaching and
advising and the conundrum between support from and for family among others propelled them onto different trajectories in
their quest for transfer As this book makes painfully clear the current state of transfer acts as a mechanism that perpetuates

and worsens inequities in educational outcomes As Xueli Wang argues to cultivate an equitable STEM transfer pathway culturally relevant and responsive supports that are accessible welcoming and validating must be put in place at the institutional level and appeal to the talent motivation and unique needs of historically marginalized students In doing so postsecondary institutions will be better positioned to fulfill their promise as an equitable pathway to bachelor s degrees and beyond [Get Set, Go!](#) Thomas R.
