IM Harris

Mindset Learn Business Studies Essays Grade 11:

Intercultural Management Dirk Holtbrügge, 2022-02-25 This textbook explores the reasons for intercultural differences and their effects on the behavior of individuals and organizations within the context of management. The text embraces the presence of ambiguity and complexity and encourages critical thinking when it comes to intercultural relations in order to avoid ethnocentrism, stereotyping and prejudice as well as overly simplistic solutions. Integrating findings from management but also the humanities and social sciences as well as politics and popular culture, intercultural management is understood as a phenomenon that transcends disciplinary boundaries and includes questions around identity constructions, power relations and ethics. This makes intercultural management a fascinating and rewarding subject to study. Throughout the author encourages an analytical approach to intercultural management built upon strong methodological foundations and draws on examples from a wide range of different contexts and cultures to help reflectively translate research and concepts into practice in a way that is lively and engaging. This textbook is essential reading for students taking university courses related to intercultural management. Lecturers can visit the companion website to access a Teaching Guide and PowerPoint slides that can be adapted and edited to suit teaching needs. Dirk Holtbrügge is Professor of International Management at the School of Business Economics and Society, Friedrich Alexander University Erlangen-Nürnberg, Germany.

Unleadership Selen Kars-Ünlüoğlu, Carol Jarvis, Hugo Gaggiotti, 2024-03-04 Leaderly acts and practices from unexpected places are often overlooked and yet have remarkable power. These spontaneous acts are in sharp contrast to those of formal leaders in governments and leading corporations. Global events like the Covid 19 pandemic and the climate crisis light up these differences. This book delves deeper, exploring these leaderly acts and practices more fully and beyond extraordinary events. The authors describe these as unleadership, a term defined in this book as a set of acts and practices that are undertaken in a spirit of spontaneity and generosity for social good. Four dimensions of unleadership are identified in this book: paying it forward, living with the unknown, catching the wave and confident connecting and collaborating. Unleadership exposes the potential that is unleashed when members of the community discover their own power to act and reclaim what they have delegated to their leaders. Based on extensive research, the authors highlight the flourishing of alternative forms of leading that encourage rethinking ideas of leadership and followership. They provide practical guidance to organisations and practitioners for enriching their leaderly capacity and cultivating unleadership practices to co-exist with and complement leadership practices. Unleadership is an invaluable resource for leaders and managers in public and private organisations as well as students of leadership and organisational development.

The Best 296 Business Schools, 2016 Princeton Review (Firm), 2015-10 Provides a detailed overview of the best business schools across North America, including information on each school's academic program, competitiveness, financial aid, admissions requirements and social scenes.
