

TANK LEVEL GAUGE

Series : LT-3100
3200

CAT. No. 3230300

MAINTENANCE MANUAL

This manual describes procedures for checking, repairing and troubleshooting of LT-3100/3200 Series Tank Level Gauge which are required for maintaining its proper performance and safe operation at the site.

Routine maintenance

Though the tank level gauge requires no particular routine maintenance, ambient temperature and that on the instrument should be checked from time to time for proper operation of the electrical system having the explosionproof construction.

Periodical maintenance

Service lives of the parts are dependent on ambient conditions and frequency of level variations. Further, the electrical system of the explosionproof construction comprises parts which cannot be kept in their optimum conditions through routine maintenance only. It is therefore necessary to carry out periodical maintenance at a frequency matched with the operating condition at the site.

For periodical check items, see Table 1.

Cautions for safe maintenance

- For checking the instrument while it is energized, do not open the balancer, gauge head cover or terminal boxes.
- During works in explosive atmosphere, take care not to produce sparks.
- Devices and apparatus to be used in explosive atmosphere must have explosionproof constructions. If it is impossible to use appliance of such type, provide sufficient ventilation to prevent explosive gas from stagnation.

Overall Operation Check of Tank Level Gauge

Check the tank level gauge for its overall operation by utilizing the power switch. It can be checked by confirming that indicator reading decreases upon turning OFF the power switch and increases upon turning ON the switch.

Check of Setting Tension for Balancer

Setting tension can be confirmed by using the balance checker supplied as an optional component for maintenance.

• Handling of balancechecker

- (1) Turn OFF the power switch.
- (2) After opening the rear cover of the balancer, attach the balance checker as shown in Fig. 7.
- (3) Setting weight is graduated on the weight mount bar of the balance checker. Slide the weight until its left side is positioned at the division corresponding to the setting tension, and fix it.
- (4) By using the tape suspender, separate the measuring tape from roller (220) and pulley arm (212).
- (5) In this condition, pulley arm (212) should normally be located at the center of stopper (202).
