Force XXI Training Program-digital Project, 1999 This report discusses the Army's initial research into converting Force 21 Training Program FXXITP products to meet the increasingly pressing training needs of digital battle staffs. The report describes the activities and outcomes of the U.S. Research Institute for the Behavioral and Social Sciences (ARI) Force 21 Training Program Digital FXXITP D project. The project developed an approach that supports the conversion of existing training products in order to meet new training needs. During the project, the conversion approach was employed to research and enact conventional to digital conversions of selected FXXITP products including the Battle Staff Training System (BSTS) and Combined Arms Operations at Brigade Level Realistically Achieved Through Simulation (COBRAS) vignettes, Brigade Staff Exercise BSE, and Brigade and Battalion Staff Exercise BBSE. In addition to the conversion approach and prototype digital training products, the project identified a number of lessons for the continuing development of digital training and the digital force Stinet.

Military Review, 2002 *Manuals Combined: U.S. Marine Corps Basic Reconnaissance Course (BRC) References*, Over 5,300 total pages. MARINE RECON Reconnaissance units are the commander's eyes and ears on the battlefield. They are task organized as a highly trained six-man team capable of conducting specific missions behind enemy lines. Employed as part of the Marine Air Ground Task Force reconnaissance teams, they provide timely information to the supported commander to shape and influence the battlefield. The varying types of missions a Reconnaissance team conducts depends on how deep in the battle space they are operating. Division Reconnaissance units support the close and distant battlespace, while Force Reconnaissance units conduct deep reconnaissance in support of a landing force. Common missions include but are not limited to: Plan, coordinate, and conduct amphibious ground reconnaissance and surveillance to observe, identify, and report enemy activity and collect other information of military significance; Conduct specialized surveying to include underwater reconnaissance and/or demolitions, beach permeability, and topography; routes, bridges, structures, urban, rural areas, helicopter landing zones (LZ), parachute drop zones (DZ), aircraft forward operating sites, and mechanized reconnaissance missions. When properly task organized, with other forces, equipment, or personnel, they assist in specialized engineer, radio, and other special reconnaissance missions; Infiltrate mission areas by necessary means to include surface, subsurface, and airborne operations; Conduct Initial Terminal Guidance (ITG) for helicopters, landing craft, parachutists, air delivery, and resupply; Designate and engage selected targets with organic weapons and force fires to support battlespace shaping. This includes designation and terminal guidance of precision-guided munitions; Conduct post-strike reconnaissance to determine and report battle damage assessment on a specified target or area; Conduct limited-scale raids and ambushes. Just a SAMPLE of the included publications: BASIC RECONNAISSANCE COURSE PREPARATION GUIDE, RECONNAISSANCE RECON TRAINING AND READINESS T R MANUAL, RECONNAISSANCE REPORTS GUIDE, GROUND RECONNAISSANCE OPERATIONS, GROUND COMBAT OPERATIONS, Supporting Arms Observer, Spotter, and Controller, DEEP AIR SUPPORT.
