Sims, 1909 The Sinking Middle Class David Roediger, 2022-06-21 The Sinking Middle Class challenges the save the middle class rhetoric that dominates our political imagination The slogan misleads us regarding class nation and race Talk of middle class salvation reinforces myths holding that the US is a providentially middle class nation Implicitly white the middle class becomes viewed as unheard amidst supposed concerns for racial justice and for the poor Roediger shows how little the US has been a middle class nation The term seldom appeared in US writing before 1900 Many white Americans were self employed but this social experience separated them from the contemporary middle class of today overwhelmingly employed and surveilled Today s highly unequal US hardly qualifies as sustaining the middle class The idea of the US as a middle class place required nurturing Those doing that ideological work from the business press to pollsters to intellectuals celebrating the results of free enterprise gained little traction until the Depression and Cold War expanded the middle class brand Much later the book s sections on liberal strategist Stanley Greenberg detail saving the middle class entered presidential politics Both parties soon defined the middle class to include over 90% of the population precluding intelligent attention to the poor and the very rich Resurrecting radical historical critiques of the middle class Roediger argues that middle class identities have so long been shaped by debt anxiety about falling and having to sell one s personality at work that misery defines a middle class existence as much as fulfillment **Fear of Crime** Murray Lee, Stephen Farrall, 2008-07-03 Why is fear of crime so rife in society today The government and media have ploughed money and resources into surveys and initiatives to find out As a concept fear of crime has produced considerable academic debate and this book brings together a collection of new and cutting edge articles from key scholars in criminology which question the orthodoxy of fear of crime models

Privilege and Anxiety Hagen Koo, 2022-07-15 In Privilege and Anxiety Hagen Koo examines what has happened to the Korean middle class in the era of neoliberal globalization and demonstrates that global economic change brought more profound changes than mere economic decline and shrinking size to this class Globalization has inserted an axis of polarization into the middle class separating a small minority that benefits from the globalized economy from the large majority that suffers from it This internal differentiation generates a challenging dynamic within Korean society as the newly affluent seek to distinguish themselves from the rest of the middle class to establish a new privileged class position Privilege and Anxiety explores how these tensions play out in three areas consumption and lifestyle residential differentiation and

education In all three areas the dominant orientation of the affluent middle class is to preserve their newfound privilege and to pass it onto their children Their new class practices Koo argues bring great anxiety to both the winners and losers of neoliberal globalization
