$$K_2 + mg(3.00) + 0 = 0 + mg(25.0) + \frac{1}{2}k(\Delta x)^2$$

$$\therefore \frac{1}{2}(80.0\text{kg})v^2 = 80.0\text{kg}(9.80\text{g})(25.0 - 3.00) + \frac{1}{2}(600\text{g})(3.00)^2$$

$$y_1 = y_0 + v_{y0}\Delta t + \frac{1}{2}a_y\Delta t^2$$

$$\therefore 4.90t^2 - 11.2t - 3.00 = 0$$

$$x_1 = x_0 + v_{x0}\Delta t + \frac{1}{2}a_x\Delta t^2$$

Kolb, 2015-11-20 A detailed and engaging account of the development of the superconducting supercollider one of the largest scientific undertakings in the United States Journal of American History Starting in the 1950s US physicists dominated the search for elementary particles aided by the association of this research with national security they held this position for decades In an effort to maintain their hegemony and track down the elusive Higgs boson they convinced President Reagan and Congress to support construction of the multibillion dollar Superconducting Super Collider project in Texas the largest basic science project ever attempted But after the Cold War ended and the estimated SSC cost surpassed ten billion dollars Congress terminated the project in October 1993 Drawing on extensive archival research contemporaneous press accounts and over one hundred interviews with scientists engineers government officials and others involved *Tunnel Visions* tells the riveting story of the aborted SSC project The authors examine the complex interrelated causes for its demise including problems of large project management continuing cost overruns and lack of foreign contributions In doing so they ask whether Big Science has become too large and expensive including whether academic scientists and their government overseers can effectively manage such an enormous undertaking Focusing on the scientific technical and political conflicts that led to delays ever rising costs and eventually the SSC's cancellation by Congress *Tunnel Visions* is a true techno thriller Burton Richter winner of the Nobel Prize in Physics Most good science stories are tales of discovery and success but failure can be just as riveting Here two historians and an archivist describe the greatest particle physics experiment that never was Scientific American **Japan's Secret War** Robert K. and tells the riveting full story of the hiring decisions universities made during the Nazi era Stretching and Exploiting Thresholds for High-Order War Ben Connable, Jason H. Campbell, Dan Madden, 2016-05-05 Since 9 11 Russia China and Iran have successfully exploited or stretched U S thresholds for high order war in order to further their strategic ends and in the process undermine U S interests Each of these countries has made expert use of some combination of measures short of war to enact its strategies This report describes those measures and how these nation states use them and explains why U S notions of thresholds might be outdated **Atomic Bill** Vincent Kiernan, 2022-11-15 In Atomic Bill Vincent Kiernan examines the fraught career of New York Times science journalist William L Laurence and shows his professional and personal lives to be a cautionary tale of dangerous proximity to power Laurence was fascinated with atomic science and its militarization When the Manhattan Project drew near to perfecting the atomic bomb he was recruited to write much of the government's press materials that were distributed on the day that Hiroshima was obliterated That instantly crowned Laurence as one of the leading journalistic experts on the atomic bomb As the Cold War dawned some assessed Laurence as a propagandist defending the militarization of atomic energy For others he was a skilled science communicator who provided the public with a deep understanding of the atomic bomb Laurence leveraged his perch at the Times to engage in paid speechmaking book writing filmmaking and radio broadcasting His work for the Times declined in quality even as his relationships with people in power grew closer and more lucrative Atomic Bill reveals extraordinary ethical lapses by Laurence such as a cheating scandal at Harvard University and plagiarizing from press releases about atomic bomb tests in the Pacific In 1963 a conflict of interest related to the 1964 World's Fair in New York City led to his forced retirement from the Times Kiernan shows Laurence to have set the trend common among today's journalists of science and technology to prioritize gee whiz coverage of discoveries That approach in which Laurence served the interests of governmental officials and scientists recommends a full revision of our understanding of the dawn of the atomic era Spectral Invariants with Bulk, Quasi-Morphisms and Lagrangian Floer Theory Kenji Fukaya, Yong-Geun Oh, Hiroshi Ohta, Kaoru Ono, 2019-09-05 In this paper the authors first develop various enhancements of the theory of spectral invariants of Hamiltonian Floer homology and of Entov Polterovich theory of spectral symplectic quasi states and quasi morphisms by incorporating bulk deformations i.e deformations by ambient cycles of symplectic manifolds of the Floer homology and quantum cohomology Essentially the same kind of construction is independently carried out by Usher in a slightly less general context Then the authors explore various applications of these enhancements to the symplectic topology especially new construction of symplectic quasi states quasi morphisms and new Lagrangian intersection results on toric and non toric manifolds The most novel part of this paper is its use of open closed Gromov Witten Floer theory and its variant involving closed orbits of periodic Hamiltonian system to connect spectral invariants with bulk deformation symplectic quasi states quasi morphism to the Lagrangian Floer theory with bulk deformation The authors use this open closed Gromov Witten Floer theory to produce new examples Using the

calculation of Lagrangian Floer cohomology with bulk they produce examples of compact symplectic manifolds which admits uncountably many independent quasi morphisms They also obtain a new intersection result for the Lagrangian submanifold in **Title List of Documents Made Publicly Available** U.S. Nuclear Regulatory Commission,1982 *Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)* Union of International Associations,2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events **United States Army Aviators' Equipment, 1917-1945** C.G. Sweeting,2015-03-27 Seven decades after World War II we now know that the margin between Allied victory and defeat was often narrower than many realized The decisive actions of leaders generals and war heroes have been well documented but less well known are the technological developments that made victory possible and laid the groundwork for postwar progress Based on more than ten years of research this book describes how American airmen became the best outfitted aviators of the war tracing the development of virtually every piece of personal equipment used by United States air forces Drawing on original sources including formerly classified documents the author details the myriad types of respirator equipment parachutes body armor pressure suits and other flying and survival gear that were instrumental in making U S pilots and air crews effective Personal anecdotes bring to life the design and testing of combat flight equipment More than 160 photographs are included most published here for the first time
