

CONTROL OPERATION

1. VOLUME CONTROL
2. TONE CONTROL
3. SELECTOR MODE SWITCH
4. PICKUP SELECTOR SWITCH

The Selector Mode Switch and Pickup Selector Switch work together to produce a wide range of tones. When the Selector Mode Switch is turned to its clockwise position, the Pickup Selector Switch selects only single-coil or pickup-in-parallel combinations, exactly like those on Fender Stratocaster models. When the Selector Mode Switch is in the counter-clockwise position, the Pickup Selector Switch produces a variety of pickup-in-series combinations.

NOTE: When the Pickup Selector Switch is positioned as in Figure 2, the Selector Mode Switch will have no effect. The resultant sound is clear and very bright— a traditional "Fender Lead Pickup" sound.

The Tone Control and Volume Control both function normally in all switch positions.
