The dependent variable was the observed mean score. The two other groups control and target distribution of the three variables (see table 1) were 100% correct. Therefore having a correct solution is always observed, and it is not possible to see a correct solution in other groups.

There is a growing body of research on the effects of the Internet on the social and psychological well-being of adolescents. The Internet has become a significant part of their lives, providing a platform for social interaction, information seeking, and entertainment. However, it also presents challenges, such as cyberbullying, online harassment, and exposure to inappropriate content. This research aims to explore the impact of the Internet on the social and psychological well-being of adolescents, focusing on the role of social media and online communication. The study will investigate the relationship between Internet use and various factors, including self-esteem, social skills, and mental health. The findings will provide valuable insights into the potential benefits and risks of the Internet for adolescents, informing the development of effective interventions and support programs.

The researchers caution against assuming that a company is just a set of people working together, without leaders or sets of authority. The researchers also warn leaders to always consider how their decisions will affect the bottom line.
