Scientific Papers Made Easy Stuart West, Lindsay Turnbull, 2023-01-30 Writing scientific publications is a fundamental step in the research process Furthermore as science becomes more interdisciplinary and the number of journals continues to expand individual papers increasingly need to stand out to be read and have any form of impact It is widely assumed that students and early career scientists will simply acquire the necessary expertise However this could not be further from the truth many early career scientists find writing both intimidating and overwhelming writing is a skill that needs to be learnt and actively developed This novel book s fundamental principle is simple the reader must come first The purpose of a scientific paper is to pass on knowledge and so impactful writing must focus on attracting holding and illuminating readers The authors demonstrate how just a few simple pointers can significantly improve both writing quality and impact They tackle each component of a paper in turn providing a simple framework that makes clear what needs to be included and what doesn t and in what order They also provide advice for writing up different types of science from laboratory experiments to theoretical modelling The focus throughout is on the need to use simple jargon free English and to assume that the reader has little or no prior knowledge In summary the book is about writing better scientific papers that are more likely to be read and have impact Scientific Papers Made Easy is targeted at a broad audience of students and professionals across the biological life and human sciences It uses simple biological and human examples that assume no prior knowledge and will resonate with any scientist

Learning to Write as a Hostile Act for Latino Students Raul E. Ybarra, 2004 Cultural differences play a part in communication breakdowns between students and teachers and only a complete understanding of the model that English instructors use when teaching writing gives us an insight into the reasons why This book observes and analyzes the communication patterns of Latino students in an English course at the college level closely observing the interaction between Latino students and the teacher as well as between Latino students and other student groups in the class Learning to Write as a Hostile Act for Latino Students concludes that cultural differences and the resulting miscommunications significantly contribute to the negative impressions Latino students have about the writing process and English courses Understanding these differences is crucial to improving the teaching of writing to Latino and other minority students
