***The Waste-Free World*** Ron Gonen,2024-05-14 The next revolution in business will provide for a sustainable future, from founder, CEO and circular economy expert Ron Gonen. Our take: make waste economy has cost consumers and taxpayers billions while cheating us out of a habitable planet. But it doesn't have to be this way. *The Waste Free World* makes a persuasive, forward looking case for a circular economic model, a closed loop system that wastes no natural resources. Entrepreneur, CEO and sustainability expert Ron Gonen argues that circularity is not only crucial for the planet but holds immense business opportunity. As the founder of an investment firm focused on the circular economy, Gonen reveals brilliant innovations emerging worldwide: smart packaging, robotics that optimize recycling, nutrient rich fabrics, technologies that convert food waste into energy for your home and many more. Drawing on his experience in technology, business and city government and interviews with leading entrepreneurs and top companies, he introduces a vital and growing movement. *The Waste Free World* invites us all to take part in a sustainable and prosperous future where companies foster innovation, investors recognize long term value creation and consumers can align their values with the products they buy.

**Product Stewardship in Action** Helen Lewis,2017-09-08 *Product Stewardship in Action* describes how and why leading companies are taking responsibility for the environmental impact of their products and packaging. Product stewardship, often referred to as extended producer responsibility or EPR, is the idea that everyone that benefits commercially from a product, including manufacturers, distributors and retailers, has a shared responsibility to minimize its environmental impacts. Written primarily for a business audience, it draws on the knowledge and experience of industry practitioners and

other experts to provide a structured approach to product responsibility within firms This will help those new to the field as well as more experienced practitioners to develop an effective response to stakeholder concerns about the environmental impacts of their products and packaging Unlike other resources on product stewardship and EPR which tend to focus on the design or evaluation of public policy this book highlights the business case for action It argues that companies can achieve shared value both public and commercial value when they take a proactive and knowledge based approach to the life cycle management of their products Product Stewardship in Action focuses on product stewardship as an effective business strategy rather than a philanthropic exercise To be effective it needs to be based on a good understanding of product impacts and stakeholder concerns and the risks and opportunities that these present to the business The most effective responses will be those that address material issues in the product life cycle while supporting the achievement of other corporate goals and priorities
