Handbook of Food Preservation M. Shafiur Rahman, 2007-07-16 The processing of food is no longer simple or straightforward but is now a highly interdisciplinary science. A number of new techniques have developed to extend shelf life, minimize risk, protect the environment, and improve functional, sensory, and nutritional properties. The ever-increasing number of food products and preservation techniques create a need for a comprehensive reference work.

**Postharvest Disinfection of Fruits and Vegetables** Mohammed Wasim Siddiqui, 2018-08-13 Postharvest Disinfection of Fruits and Vegetables describes available technologies to reduce microbial infection for maintaining postharvest quality and safety. The book analyzes alternative and traditional methodologies and points out the significant advantages and limitations of each technique, thus facilitating both cost and time savings. This reference is for anyone in the fresh produce industry who is involved in postharvest handling and management. It discusses in detail the latest disinfection approaches, low-cost treatment strategies, management, and protocols to control fresh produce quality, diseases, and insect infestation. Includes methods to reduce microbial contamination using chlorination, ozone, pulsed light irradiation, and plasma technology. Provides practical applications of recently developed natural anti-microbial agents for eco-friendly and sustainable solutions. Explores various disinfection technologies for quality assurance and for the development of potential new technologies.

*Introduction to Advanced Food Process Engineering* Jatindra Kumar Sahu, 2014-03-24 Food materials are processed prior to their consumption using different processing technologies that improve their shelf life and maintain their physicochemical, biological, and sensory qualities. Introduction to Advanced Food Process Engineering provides a general reference on various aspects of processing, packaging, storage, and quality control.
