UPTON & ASSOCIATES

Abstract. *Staphylococcus aureus* is a ubiquitous Gram-positive bacterium that is a leading cause of nosocomial infection. *S. aureus* is also a major cause of skin and soft tissue infections. The bacterium is highly resistant to many antibiotics, and its ability to form biofilms on medical devices is a major barrier to treatment. This review discusses the current state of knowledge regarding the pathogenesis of *S. aureus* infections and the challenges associated with the development of new therapies.
