commuters probably won't get much out of *The Practical Cyclist* other than a lot of laughs frankly it's just not written for the accomplished cyclers among us But for someone just entering this wonderful world of bicycles this book is a must read Let's hope this book sells a billion copies Jack Ghost Rider Sweeney bikecommuters.com Riding a bicycle is something you never forget even if the last time you owned a bike it had playing cards pinned to the spokes People are coming back to bicycling in droves propelled by rising gas prices expanding waistlines or the allure of fancy gear bicycling for all ages has never been more popular *The Practical Cyclist* is for those who have not been actively cycling for years or perhaps are new to the sport it is bicycling for real people The author recognizes that not every cyclist cares about fancy equipment and competitive riding The book's low impact approach is uniquely geared to people who would like to come back to cycling but don't know where to begin There are many reasons for hopping back on a bike becoming healthier saving money saving the environment but mainly to have fun *The Practical Cyclist* provides simple basic information that takes the intimidation out of visiting a bike shop and includes How to choose equipment Proper riding technique Safety tips Accessories Easy rules on where when and how to ride As this book says anyone can ride a bike and look good doing it You don't have to go fast and you don't have to go far You just have to go Chip Haynes has been a year round commuter for a decade and he owns too many bicycles He writes about bicycling for *The Wire Donkey* and is known as the neighborhood bike guy in Clearwater Florida [Pharmacy on a Bicycle](#) Eric G. Bing, Marc J. Epstein, 2013-05-06 Every four minutes over 50 children under the age of five die In the same four minutes 2 mothers lose their lives in childbirth Every year malaria kills nearly 1.2 million people despite the fact that it can be prevented with a mosquito net and treated for less than 1.50 Sadly this list goes on and on Millions are dying from diseases that we can easily and inexpensively prevent diagnose and treat Why Because even though we know exactly what people need we just can't get it to them They are dying not because we can't solve a medical problem but because we can't solve a logistics problem In this profoundly important book Eric G. Bing and Marc J. Epstein lay out a solution a new kind of bottom up health care that is delivered at the source We need microclinics micropharmacies and microentrepreneurs located in the remote hard to reach communities they serve By building a new model that scales down to train and incentivize all kinds of health care providers in their own villages and towns we can create an army of on site professionals who can prevent tragedy at a fraction of the cost of top down bureaucratic programs Bing and Epstein have seen the model work and they provide example after example of the extraordinary results it has achieved in Africa Asia and Latin America This is a book about taking health care the last mile sometimes literally to prevent widespread unnecessary and easily avoided death and suffering *Pharmacy on a Bicycle* shows how the same forces of innovation and entrepreneurship that work in first world business cultures can be unleashed to save the lives of millions [The Bicycle journal](#), ed. by A.
