Emerging Health Technology Kristian Wasen, 2012-11-02 This book reports cutting edge cases of emerging health technologies Some health care fields are experiencing paradigmatic shifts because of robotic technologies and the new relationships that they create in r Health r Curing and r Caring activities The book explores emerging health care technologies such as image guided surgical robotics pharmacy robots new visualisation methods 3D 4D 5D and home telehealth management systems and their acceptance in the workplace but also more generally their special role in business and society These technologies allow health care professionals to effectively reach far beyond the current service offerings providing new methods for communication diagnosis and treatment The relocation of certain knowledge areas from physicians to patients in self care management or the reconfiguration of health care expertise from one health profession to another are examples of topics developed in this book The book describes the emerging relocation of innovative visual knowledge and expertise within health care organisations and beyond such as in the patient s home environment **The Value Matrix Approach, Creating Wealth and Success by Reaching Your Personal and Business Goals** Steven Brown, 2004-03-11 What is value Business markets are undergoing an evolution similar to that of the industrial revolution but in this case it s the electronic commerce revolution and its ability to offer value You ve undoubtedly heard the term but like most business people you may be hard pressed to come up with a clear definition of value By value do we mean savings benefits quality convenience etc To further complicate matters is trying to determine what it means for your customers An important point to consider is whose definition would you accept yours a consumer a visitor a business partner an employee The beauty of using the Value Matrix Approach is that you will be able to uncover what all of them think and act accordingly

Looking towards the future it can be seen that in order to compete in electronic commerce or for that matter any business value must be delivered. However, value must not be delivered in the eyes of the organization but rather in the eyes of the customer.

Haptics Technologies Abdulmotaieb El Saddik,Mauricio Orozco,Mohamad Eid,Jongeun Cha,2011-09-15 The term haptics refers to the science of sensing and manipulation through touch Multiple disciplines such as biomechanics psychophysics robotics neuroscience and software engineering converge to support haptics and generally haptic research is done by three communities the robotics community the human computer interface community and the virtual reality community This book is different from any other book that has looked at haptics The authors treat haptics as a new medium rather than just a domain within one of the above areas They describe human haptic perception and interfaces and present fundamentals in haptic rendering and modeling in virtual environments Diverse software architectures for standalone and networked haptic systems are explained and the authors demonstrate the vast application spectrum of this emerging technology along with its accompanying trends The primary objective is to provide a comprehensive overview and a practical understanding of haptic technologies An appreciation of the close relationship between the wide range of disciplines that constitute a haptic system is a key principle towards being able to build successful collaborative haptic environments Structured as a reference to allow for fast accommodation of the issues concerned this book is intended for researchers interested in studying touch and force feedback for use in technological multimedia systems in computer science electrical engineering or other related disciplines With its novel approach it paves the way for exploring research trends and challenges in such fields as interpersonal communication games or military applications

The Digital Consumer

Technology Handbook Amit Dhir, 2004-04-30 The consumer electronics market has never been as awash with new consumer products as it has over the last couple of years. The devices that have emerged on the scene have led to major changes in the way consumers listen to music, access the Internet, communicate, watch videos, play games, take photos, operate their automobiles, even live. Digital electronics has led to these leaps in product development, enabling easier exchange of media, cheaper and more reliable products, and convenient services. This handbook is a much needed comprehensive engineering guide to the dynamic world of today's digital consumer electronics. It provides complete details on key enabling technologies, standards, delivery and reception systems, products, appliances, and networking systems. Each chapter follows a logical progression from a general overview of each device to market dynamics to the core technologies and components that make up that particular product. The book thoroughly covers all of the key digital consumer product categories: digital TV, digital audio, mobile communications, devices, gaming consoles, DVD players, PCs and peripherals, display devices, digital imaging devices, web terminals and pads, PDAs and other handhelds, screenphones, videophones, telematics devices, eBooks and readers, and many other current and future products. To receive a FREE daily newsletter on displays and consumer electronics, go to <http://www.displaydaily.com>. Surveys crucial engineering information for every digital consumer product category, including cell phones, digital TVs, digital cameras, PDAs, and many more, the only reference available to do so. Has extremely broad market appeal to embedded systems professionals, including engineers, programmers, engineering managers, marketing and sales personnel. 1 000 000 potential readers. Helps engineers and managers make the correct design decisions based on real world data.

Proceedings of the 2nd International Conference on Democracy and Social Transformation (ICON-DEMOST 2023) Naili Ni'matul Illiyyun, Endang Supriadi, Ririh Megah Safitri, Masrohatun Masrohatun, 2024-01-05 This is an open access book. Faculty of Social and Political Science, State Islamic University Walisongo Semarang has been playing significant roles in building global peace and justice by conducting scientific research and creating a space for academic dialogue and discussion. This goal is in line with our vision to be a Research Faculty based on the unity of sciences for humanity and civilization. As part of the efforts to create a space for academic dialogue at a global level, we organize an international conference which aims to develop scientific knowledge, build institutional capacity, and strengthen international networking. The conference is also held to support State Islamic University Walisongo Semarang in achieving its vision to be an Islamic world class university. The conference raises the issue of democracy and social transformation to capture the social and political dynamics. The selection of this topic is based on the idea that technological development is becoming a crucial issue within modern society in which people tend to experience alienation within the rapid social and political transformation. Democracy as a political system that ensures transparency, citizen participation, and human rights protection is now under threat. Having the fact that there is a growing tendency of using transactional politics to win political interests, such as the use of money and identity in political processes, therefore political analysts consider this

situation as the regression of democracy Rapid social and cultural transformation as a consequence of advanced technology creates problems in modern society On one hand technology has made the life of people easier However on the other hand the sense of humanity s values and principles is declining This situation can be observed in the decrease in social solidarity and the rise of individualism Modernity that values productivity and economic growth has brought a negative impact on the life of human being and nature The exploitative character of industrialization has created an ecological crisis Advanced information technology has loosened social cohesivity and the rise of instrumental rationality has removed local genius or local wisdom from the life of society Since the ultimate goal of humanity is respecting the dignity of human beings hence bringing back humanity to the center of the development program is crucial especially in the current social and political dynamics In the political context humanity means respecting the basic rights of the citizen and putting them as a subject of political development and not perceiving citizens as only an instrument to win political power Based on the above background this conference is organized The overall goal of the conference is to mainstream humanity in the current social and political change The conference is also expected to be an arena for scholars and experts in social and political science as well as practitioners and policymakers to meet and exchange ideas and perspectives for a better future of our society
